

संभव Batch

Geography: Climate, Soil, Vegetation & Minerals

Under the guidance of Vipulendra Tripathi Sir

MODERATE LEVEL MCQS (Q1 - Q50)

- Q1.** Assertion (A): The western coast of India receives high rainfall.
Reason (R): The Western Ghats obstruct the moisture-laden winds from the Arabian Sea.

SSC CHSL Tier I 2023

- (A) A is true but R is false
(B) Both A and R are true but R is NOT the correct explanation of A
(C) A is false but R is true
(D) Both A and R are true and R is the correct explanation of A

- Q2.** Assertion (A): North-western India experiences rainfall in winter.
Reason (R): It is caused by the retreating monsoon.

SSC CGL Tier II 2022

- (A) A is false but R is true
(B) Both A and R are true but R is NOT the correct explanation of A
(C) A is true but R is false
(D) Both A and R are true and R is the correct explanation of A

- Q3.** Assertion (A): El Nino brings drought-like conditions to India.
Reason (R): El Nino represents the cooling of the central Pacific Ocean.

SSC CPO 2022

- (A) Both A and R are true and R is the correct explanation of A
(B) A is false but R is true
(C) Both A and R are true but R is NOT the correct explanation of A
(D) A is true but R is false

Q4. Assertion (A): Mango showers occur in Kerala and Karnataka.

Reason (R): They help in the early ripening of mangoes.

SSC MTS 2023

(A) Both A and R are true but R is NOT the correct explanation of A

(B) A is true but R is false

(C) Both A and R are true and R is the correct explanation of A

(D) A is false but R is true

Q5. Assertion (A): The interior of the Deccan plateau receives low rainfall.

Reason (R): It lies in the rain-shadow region of the Western Ghats.

SSC CGL Tier II 2021

(A) Both A and R are true but R is NOT the correct explanation of A

(B) A is true but R is false

(C) A is false but R is true

(D) Both A and R are true and R is the correct explanation of A

Q6. Match List I with List II:

List I:

- a. Loo
- b. Mango Showers
- c. Kalbaishakhi
- d. Blossom Showers

List II:

- 1. North India
- 2. Kerala
- 3. West Bengal
- 4. Karnataka

SSC CHSL Tier I 2023

(A) a-2, b-1, c-4, d-3

(B) a-4, b-3, c-2, d-1

(C) a-1, b-3, c-2, d-4

(D) a-1, b-2, c-3, d-4

Q7. Match List I with List II:

List I:

- a. Summer Season
- b. Winter Season
- c. Retreating Monsoon
- d. Advancing Monsoon

List II:

- 1. March to May
- 2. December to February
- 3. October to November
- 4. June to September

SSC MTS 2023

(A) a-1, b-3, c-4, d-2

(B) a-2, b-1, c-4, d-3

(C) a-1, b-2, c-3, d-4

(D) a-4, b-1, c-2, d-3

Q8. Match List I with List II:

List I:

- a. Equatorial Climate
- b. Tropical Monsoon
- c. Desert Climate
- d. Tundra

List II:

- 1. Amazon Basin
- 2. Indian Subcontinent
- 3. Thar
- 4. Arctic Region

SSC CGL Tier II 2021

(A) a-2, b-1, c-4, d-3

(B) a-4, b-3, c-2, d-1

(C) a-1, b-2, c-3, d-4

(D) a-1, b-3, c-2, d-4

Q9. Consider the following statements regarding Indian Monsoon:

I. The onset usually happens in early June.

II. It withdraws completely by July.

III. It is heavily influenced by the Tibetan plateau.

Which of the statements given above is/are correct?

SSC MTS 2023

(A) Only I and III

(B) Only II and III

(C) Only I and II

(D) All I, II, and III

Q10. Consider the following statements regarding Western Disturbances:

- I. They originate in the Mediterranean Sea.
- II. They bring beneficial rain to Rabi crops in NW India.
- III. They are brought to India by the Easterly jet stream.

Which of the statements given above is/are correct?

SSC CGL Tier I 2023

- (A) Only II and III
- (B) All I, II, and III
- (C) Only I and II
- (D) Only I and III

Q11. Consider the following statements regarding the ITCZ:

- I. It stands for Inter Tropical Convergence Zone.
- II. It is a high-pressure zone.
- III. It shifts northwards during the Indian summer.

Which of the statements given above is/are correct?

SSC CGL Tier II 2021

- (A) Only II and III
- (B) Only I and II
- (C) All I, II, and III
- (D) Only I and III

Q12. Consider the following statements regarding Coriolis Force:

- I. It deflects winds to the right in the Northern Hemisphere.
- II. It deflects winds to the left in the Southern Hemisphere.
- III. It is maximum at the equator.

Which of the statements given above is/are correct?

SSC MTS 2023

- (A) All I, II, and III
- (B) Only II and III
- (C) Only I and III
- (D) Only I and II

Q13. Which of the following statements regarding the Retreating Monsoon is NOT correct?

SSC CHSL Tier I 2023

- (A) It brings rainfall to the Coromandel Coast.
- (B) It occurs during October and November.
- (C) It brings heavy rainfall to the Malabar Coast.
- (D) It is associated with clear skies in northern India.

Q14. Which of the following statements regarding the climate of India is NOT correct?

SSC CGL Tier II 2021

- (A) The Himalayas protect India from cold central Asian winds.
- (B) Rainfall is highly highly erratic and unevenly distributed.
- (C) The Tropic of Cancer passes through the middle of the country.
- (D) India has a strictly equatorial climate.

Q15. Which of the following statements regarding Cyclones in India is NOT correct?

SSC CGL Tier I 2023

- (A) They occur most frequently during the advancing monsoon season in July. (B) They primarily affect the eastern coast.
- (C) They originate in the Bay of Bengal and Andaman Sea. (D) They are low-pressure systems.

Q16. Which of the following statements regarding local winds is NOT correct?

SSC CGL Tier II 2022

- (A) Blossom showers are beneficial for coffee. (B) Loo is a cold and dry wind.
- (C) Mango showers are pre-monsoon showers. (D) Kalbaishakhi causes thunderstorms in Bengal.

Q17. Which of the following statements regarding atmospheric pressure is NOT correct?

SSC CHSL Tier I 2023

- (A) Cold air is generally denser than warm air. (B) Equatorial regions generally experience low pressure.
- (C) Wind blows from high pressure to low pressure areas. (D) Pressure increases with an increase in altitude.

Q18. Assertion (A): Black soil is highly suitable for cotton cultivation.

Reason (R): It has a high water-retaining capacity.

SSC CGL Tier I 2023

- (A) Both A and R are true but R is NOT the correct explanation of A (B) A is false but R is true
- (C) Both A and R are true and R is the correct explanation of A (D) A is true but R is false

Q19. Assertion (A): Laterite soil is poor in fertility.

Reason (R): It is formed by intense leaching due to heavy rainfall.

SSC CGL Tier I 2023

- (A) A is false but R is true (B) A is true but R is false
- (C) Both A and R are true but R is NOT the correct explanation of A (D) Both A and R are true and R is the correct explanation of A

Q20. Assertion (A): Alluvial soil is the most widespread soil in India.
Reason (R): It is deposited by the Himalayan and Peninsular river systems.

SSC CGL Tier II 2021

(A) Both A and R are true and R is the correct explanation of A

(C) A is true but R is false

(B) Both A and R are true but R is NOT the correct explanation of A

(D) A is false but R is true

Q21. Assertion (A): Red soil appears red in colour.
Reason (R): It is extremely rich in humus and nitrogen.

SSC MTS 2023

(A) A is true but R is false

(C) A is false but R is true

(B) Both A and R are true but R is NOT the correct explanation of A

(D) Both A and R are true and R is the correct explanation of A

Q22. Assertion (A): Evergreen forests do not shed their leaves simultaneously.
Reason (R): They receive rainfall of less than 70 cm annually.

SSC CGL Tier II 2022

(A) A is true but R is false

(C) Both A and R are true but R is NOT the correct explanation of A

(B) A is false but R is true

(D) Both A and R are true and R is the correct explanation of A

Q23. Match List I with List II:

List I:

- a. Alluvial Soil
- b. Black Soil
- c. Laterite Soil
- d. Arid Soil

List II:

- 1. Northern Plains
- 2. Deccan Plateau
- 3. Western Ghats
- 4. Western Rajasthan

SSC CHSL Tier I 2023

(A) a-2, b-1, c-4, d-3

(C) a-1, b-3, c-2, d-4

(B) a-4, b-3, c-2, d-1

(D) a-1, b-2, c-3, d-4

Q24. Match List I with List II:

List I:

- a. Khadar
- b. Bhangar
- c. Regur
- d. Kankar

List II:

- 1. New Alluvium
- 2. Old Alluvium
- 3. Black Soil
- 4. Calcareous nodules

SSC CHSL Tier I 2023

(A) a-1, b-3, c-4, d-2

(B) a-3, b-4, c-1, d-2

(C) a-1, b-2, c-3, d-4

(D) a-2, b-1, c-4, d-3

Q25. Match List I with List II:

List I:

- a. Tropical Evergreen
- b. Tropical Deciduous
- c. Tropical Thorn
- d. Mangrove

List II:

- 1. Mahogany
- 2. Teak
- 3. Babool
- 4. Sundari

SSC MTS 2023

(A) a-1, b-3, c-2, d-4

(B) a-1, b-2, c-3, d-4

(C) a-2, b-1, c-4, d-3

(D) a-4, b-3, c-2, d-1

Q26. Consider the following statements regarding Alluvial Soil:

I. It is classified into Khadar and Bhangar.

II. Bhangar is highly fertile new alluvium.

III. It is generally rich in potash but poor in phosphorus.

Which of the statements given above is/are correct?

SSC CGL Tier II 2022

(A) Only I and III

(B) All I, II, and III

(C) Only I

(D) Only II and III

Q27. Consider the following statements regarding Soil Erosion:

I. Gully erosion is prominent in the Chambal basin.

II. Sheet erosion occurs on gentle slopes.

III. Contour ploughing accelerates soil erosion.

Which of the statements given above is/are correct?

SSC CGL Tier II 2021

(A) All I, II, and III

(B) Only II and III

(C) Only I and III

(D) Only I and II

Q28. Consider the following statements regarding Deciduous Forests:

I. They are also known as monsoon forests.

II. They require rainfall above 250 cm.

III. Sal, Teak, and Shisham are prominent tree species.

Which of the statements given above is/are correct?

SSC CHSL Tier I 2023

(A) Only I and II

(B) All I, II, and III

(C) Only I and III

(D) Only II and III

Q29. Consider the following statements regarding Mangrove Forests:

I. They are found in the deltas of major rivers.

II. They have breathing roots called pneumatophores.

III. They cannot survive in saline water.

Which of the statements given above is/are correct?

SSC CGL Tier II 2022

(A) All I, II, and III

(B) Only I and III

(C) Only I and II

(D) Only II and III

Q30. Which of the following statements regarding Black Soil is NOT correct?

SSC CGL Tier II 2021

(A) It is primarily found in the Brahmaputra valley.

(B) It develops deep cracks during hot weather.

(C) It is also called Regur soil.

(D) It is formed from basaltic rocks.

Q31. Which of the following statements regarding Laterite Soil is NOT correct?

SSC CGL Tier II 2021

(A) It is found in areas with high temperature and heavy rainfall.

(B) It is exceptionally rich in nitrogen and organic matter.

(C) It supports cashew nut cultivation in Kerala.

(D) It is widely used for making bricks.

Q32. Which of the following statements regarding Thorn forests is NOT correct?

SSC CHSL Tier I 2023

- (A) They are found in areas receiving over 200 cm of rainfall. (B) Babool and Kikar are common species.
- (C) Leaves are mostly thick and small to minimize transpiration. (D) The trees have deep roots to access groundwater.

Q33. Which of the following statements regarding Montane Forests is NOT correct?

SSC MTS 2023

- (A) They are found only in the coastal plains of India. (B) Oak and Chestnut are found in wet temperate montane forests.
- (C) Coniferous trees like Pine and Deodar are found at higher altitudes. (D) Alpine vegetation is found at very high altitudes near the snowline.

Q34. Which of the following statements regarding Forest Conservation is NOT correct?

SSC CPO 2022

- (A) Afforestation helps in controlling soil erosion. (B) Vanamahotsava is an initiative to increase forest cover.
- (C) Jhum cultivation promotes dense forest growth. (D) National Parks are protected areas for flora and fauna.

Q35. Assertion (A): Coal is a major source of energy in India.

Reason (R): It is found abundantly in the Gondwana rock systems.

SSC CHSL Tier I 2023

- (A) Both A and R are true but R is NOT the correct explanation of A (B) A is true but R is false
- (C) Both A and R are true and R is the correct explanation of A (D) A is false but R is true

Q36. Assertion (A): Bauxite is highly demanded in the aviation industry.

Reason (R): Aluminum extracted from bauxite is extremely heavy and dense.

SSC CGL Tier I 2023

- (A) Both A and R are true and R is the correct explanation of A (B) Both A and R are true but R is NOT the correct explanation of A
- (C) A is false but R is true (D) A is true but R is false

Q37. Assertion (A): Solar energy is considered a renewable resource.

Reason (R): It gets depleted rapidly with continuous use.

SSC CGL Tier I 2023

(A) Both A and R are true and R is the correct explanation of A

(B) A is true but R is false

(C) Both A and R are true but R is NOT the correct explanation of A

(D) A is false but R is true

Q38. Assertion (A): Jharkhand is heavily industrialized.

Reason (R): It has rich deposits of coal, iron ore, and mica.

SSC CGL Tier II 2021

(A) Both A and R are true and R is the correct explanation of A

(B) A is true but R is false

(C) Both A and R are true but R is NOT the correct explanation of A

(D) A is false but R is true

Q39. Match List I with List II:

List I:

- a. Iron Ore
- b. Copper
- c. Bauxite
- d. Mica

List II:

- 1. Bailadila
- 2. Khetri
- 3. Panchpatmali
- 4. Koderma

SSC CPO 2022

(A) a-2, b-1, c-4, d-3

(B) a-1, b-2, c-3, d-4

(C) a-4, b-3, c-2, d-1

(D) a-1, b-3, c-2, d-4

Q40. Match List I with List II:

List I:

- a. Coal
- b. Petroleum
- c. Uranium
- d. Gold

List II:

- 1. Jharia
- 2. Digboi
- 3. Jaduguda
- 4. Kolar

SSC CHSL Tier I 2023

(A) a-4, b-3, c-2, d-1

(B) a-2, b-1, c-4, d-3

(C) a-1, b-3, c-2, d-4

(D) a-1, b-2, c-3, d-4

Q41. Match List I with List II:

List I:

- a. Anthracite
- b. Bituminous
- c. Lignite
- d. Peat

List II:

- 1. Highest carbon content
- 2. Most commonly used commercial coal
- 3. Brown coal
- 4. Lowest carbon content

SSC CGL Tier I 2023

(A) a-3, b-4, c-1, d-2

(B) a-2, b-1, c-4, d-3

(C) a-1, b-2, c-3, d-4

(D) a-1, b-3, c-4, d-2

Q42. Match List I with List II:

List I:

- a. Magnetite
- b. Hematite
- c. Galena
- d. Bauxite

List II:

- 1. Best quality iron ore
- 2. Most abundant iron ore in India
- 3. Lead ore
- 4. Aluminum ore

SSC CGL Tier I 2023

(A) a-1, b-3, c-2, d-4

(B) a-2, b-1, c-4, d-3

(C) a-1, b-2, c-3, d-4

(D) a-4, b-3, c-2, d-1

Q43. Consider the following statements regarding Mica:

I. India is one of the leading producers of Mica.

II. It has excellent dielectric strength.

III. It is a good conductor of electricity.

Which of the statements given above is/are correct?

SSC CHSL Tier I 2023

(A) All I, II, and III

(B) Only I and III

(C) Only II and III

(D) Only I and II

Q44. Consider the following statements regarding Petroleum in India:

I. Digboi in Assam is the oldest oil field in India.

II. Bombay High is an offshore oil field.

III. India is completely self-sufficient in petroleum production.

Which of the statements given above is/are correct?

SSC CGL Tier II 2022

(A) All I, II, and III

(B) Only I and II

(C) Only II and III

(D) Only I and III

Q45. Consider the following statements regarding Non-conventional energy:

I. Wind and Solar energy are non-conventional sources.

II. They are generally pollution-free.

III. They rely heavily on fossil fuel combustion.

Which of the statements given above is/are correct?

SSC CGL Tier II 2021

(A) Only I and III

(B) Only I and II

(C) All I, II, and III

(D) Only II and III

Q46. Which of the following statements regarding Iron Ore in India is NOT correct?

SSC CHSL Tier I 2023

- | | |
|---|--|
| (A) Odisha and Jharkhand are major iron ore producing states. | (B) India imports all of its iron ore requirements. |
| (C) Bailadila mines are famous for high-grade iron ore. | (D) Magnetite has a higher iron content than Hematite. |

Q47. Which of the following statements regarding Coal in India is NOT correct?

SSC CGL Tier II 2022

- | | |
|--|--|
| (A) Lignite is predominantly mined in Neyveli, Tamil Nadu. | (B) Gondwana coal is metallurgically significant. |
| (C) Jharia is the largest coalfield in India. | (D) Anthracite is the most abundantly found coal in India. |

Q48. Which of the following statements regarding Copper in India is NOT correct?

SSC CGL Tier II 2021

- | | |
|---|---|
| (A) The Balaghat mines in MP produce a significant portion of India's copper. | (B) The Khetri mines are located in Rajasthan. |
| (C) India has massive surplus reserves of copper. | (D) Copper is widely used in the electrical industry. |

Q49. Which of the following statements regarding Manganese is NOT correct?

SSC CPO 2022

- | | |
|--|--|
| (A) Odisha is a leading producer of Manganese. | (B) It is exclusively used for agricultural fertilizers. |
| (C) It is an important raw material for smelting iron ore. | (D) It is used in manufacturing bleaching powder. |

Q50. Which of the following statements regarding Bauxite is NOT correct?

SSC MTS 2023

- | | |
|--|--|
| (A) It is the primary ore for extracting aluminum. | (B) Panchpatmali deposits are located in Odisha. |
| (C) It forms by the decomposition of rocks rich in aluminum silicates. | (D) It is mainly formed in arid desert regions. |

HARD LEVEL MCQS (Q51 - Q100)

Q51. Assertion (A): During a positive Indian Ocean Dipole (IOD), the Indian summer monsoon is generally strengthened.
Reason (R): A positive IOD is characterized by warmer sea surface temperatures in the western Indian Ocean relative to the east. **SSC CGL Tier II 2021**

(A) A is false but R is true

(B) Both A and R are true but R is NOT the correct explanation of A

(C) A is true but R is false

(D) Both A and R are true and R is the correct explanation of A

Q52. Assertion (A): The Tamil Nadu coast remains relatively dry during the South-West Monsoon.
Reason (R): It is situated parallel to the Bay of Bengal branch and lies in the rain-shadow area of the Arabian Sea branch. **SSC CPO 2022**

(A) Both A and R are true but R is NOT the correct explanation of A

(B) A is false but R is true

(C) A is true but R is false

(D) Both A and R are true and R is the correct explanation of A

Q53. Assertion (A): El Nino Modoki generally brings enhanced rainfall to the Indian subcontinent.
Reason (R): It is characterized by an anomalous warming in the central equatorial Pacific flanked by colder waters. **SSC MTS 2023**

(A) A is false but R is true

(B) A is true but R is false

(C) Both A and R are true but R is NOT the correct explanation of A

(D) Both A and R are true and R is the correct explanation of A

Q54. Assertion (A): Tropical cyclones do not form very close to the equator (0 to 5 degrees latitude).
Reason (R): The Coriolis force is virtually zero at the equator, preventing the required rotational spin. **SSC CGL Tier I 2023**

(A) Both A and R are true and R is the correct explanation of A

(B) A is true but R is false

(C) A is false but R is true

(D) Both A and R are true but R is NOT the correct explanation of A

Q55. Assertion (A): The Easterly Jet Stream plays a crucial role in the onset of the Indian summer monsoon.

Reason (R): It steers the Western Disturbances into the Indian subcontinent during summer. **SSC CGL Tier I 2023**

(A) A is false but R is true

(B) A is true but R is false

(C) Both A and R are true but R is NOT the correct explanation of A

(D) Both A and R are true and R is the correct explanation of A

Q56. Match List I with List II:

List I:

- a. Amw
- b. As
- c. BShw
- d. Cwg

List II:

- 1. Monsoon with short dry season (West Coast)
- 2. Monsoon with dry summer (Coromandel Coast)
- 3. Semi-arid Steppe climate (NW India/Deccan)
- 4. Monsoon type with dry winter (Ganga Plain) **SSC CGL Tier I 2023**

(A) a-1, b-2, c-3, d-4

(B) a-4, b-3, c-2, d-1

(C) a-2, b-1, c-4, d-3

(D) a-1, b-3, c-2, d-4

Q57. Match List I with List II:

List I:

- a. Positive IOD
- b. Negative IOD
- c. El Nino
- d. La Nina

List II:

- 1. Warmer Western Indian Ocean
- 2. Cooler Western Indian Ocean
- 3. Warming of Eastern Pacific
- 4. Cooling of Eastern Pacific **SSC CGL Tier II 2021**

(A) a-1, b-2, c-3, d-4

(B) a-2, b-1, c-4, d-3

(C) a-1, b-3, c-4, d-2

(D) a-3, b-4, c-1, d-2

Q58. Match List I with List II:

List I:

- a. Tropical Cyclone
- b. Extratropical Cyclone
- c. Tornado
- d. Willy-Willy

List II:

- 1. Formed over warm oceans (>27 C)
- 2. Frontal origin in mid-latitudes
- 3. Violent funnel-shaped storm over land
- 4. Tropical cyclone in Australia

SSC CGL Tier II 2022

(A) a-2, b-1, c-4, d-3

(B) a-1, b-3, c-2, d-4

(C) a-4, b-3, c-2, d-1

(D) a-1, b-2, c-3, d-4

Q59. Consider the following statements regarding the Southern Oscillation Index (SOI):

I. It measures the atmospheric pressure difference between Tahiti and Darwin.

II. A consistently negative SOI indicates an El Nino episode.

III. A positive SOI is generally unfavourable for the Indian monsoon.

Which of the statements given above is/are correct?

SSC MTS 2023

(A) Only II and III

(B) All I, II, and III

(C) Only I and III

(D) Only I and II

Q60. Consider the following statements regarding the Jet Streams over India:

I. The Sub-Tropical Westerly Jet Stream lies south of the Himalayas during winter.

II. The Tropical Easterly Jet Stream forms over the peninsular region during summer.

III. The shift of the Westerly Jet Stream to the north of the Himalayas triggers the monsoon onset.

Which of the statements given above is/are correct?

SSC CGL Tier I 2023

(A) Only I and III

(B) All I, II, and III

(C) Only II and III

(D) Only I and II

- Q61.** Consider the following statements regarding the Monsoon 'Breaks':
- I. They refer to rainless intervals during the South-West monsoon season.
 - II. In northern India, breaks occur when the monsoon trough shifts towards the Himalayan foothills.
 - III. Breaks result in heavy rainfall in the core plains and dry conditions in the Northeast.
- Which of the statements given above is/are correct? **SSC CHSL Tier I 2023**

- (A) Only I and III (B) Only II and III
(C) All I, II, and III (D) Only I and II

- Q62.** Consider the following statements regarding the Walker Circulation:
- I. It is an oceanic circulation parallel to the equator in the Pacific Ocean.
 - II. It is an atmospheric circulation cell over the equatorial Pacific.
 - III. Its weakening is directly associated with La Nina conditions.
- Which of the statements given above is/are correct? **SSC MTS 2023**

- (A) All I, II, and III (B) Only I and III
(C) Only II (D) Only I

- Q63.** Which of the following statements regarding the Koppen Climate Classification of India is NOT correct? **SSC MTS 2023**

- (A) 'Amw' characterizes the western coastal plains with heavy monsoon rainfall. (B) 'Cwg' characterizes the vast northern plains of India.
(C) 'Aw' represents a tropical savannah climate found mostly in western Rajasthan. (D) 'E' type climate is found in the higher altitude regions of Jammu & Kashmir and Ladakh.

- Q64.** Which of the following statements regarding Tropical Cyclones is NOT correct?

SSC CGL Tier II 2022

- (A) They require a strong vertical wind shear for their intense development. (B) They derive their energy from the latent heat of condensation.
(C) They are characterized by a calm, cloudless central 'eye'. (D) They dissipate rapidly after making landfall.

Q65. Which of the following statements regarding Western Disturbances is NOT correct?

SSC CPO 2022

(A) They are highly beneficial for the Rabi crops in North-Western India.

(B) They are deep tropical cyclones originating in the Bay of Bengal.

(C) They travel eastwards driven by the westerly jet streams.

(D) They are extra-tropical storms originating in the Mediterranean region.

Q66. Which of the following statements regarding El Nino Southern Oscillation (ENSO) is NOT correct?

SSC CGL Tier II 2022

(A) La Nina leads to a high-pressure system over the western Pacific and Indonesia.

(B) El Nino corresponds to the warm oceanic phase.

(C) ENSO is a coupled ocean-atmosphere phenomenon.

(D) The Southern Oscillation describes the atmospheric pressure component.

Q67. Which of the following statements regarding the Indian Summer Monsoon is NOT correct?

SSC CGL Tier I 2023

(A) The heating of the Tibetan Plateau creates a strong low-pressure zone.

(B) The Mascarene High acts as a high-pressure source driving winds towards India.

(C) The Somali Jet significantly weakens the cross-equatorial monsoonal flow.

(D) The ITCZ shifts northwards up to the Ganga plains.

Q68. Assertion (A): Vertisols (Black soils) undergo deep cracking during dry seasons. Reason (R): They contain high levels of smectite clay minerals like montmorillonite which shrink upon drying.

SSC CHSL Tier I 2023

(A) A is false but R is true

(B) Both A and R are true but R is NOT the correct explanation of A

(C) A is true but R is false

(D) Both A and R are true and R is the correct explanation of A

Q69. Assertion (A): Salinization is a major problem in the canal-irrigated areas of Punjab and Haryana.

Reason (R): Excessive irrigation leads to capillary action, drawing dissolved salts to the topsoil.

SSC CHSL Tier I 2023

(A) Both A and R are true and R is the correct explanation of A

(B) A is false but R is true

(C) Both A and R are true but R is NOT the correct explanation of A

(D) A is true but R is false

Q70. Assertion (A): Shola forests are highly threatened ecosystems.
Reason (R): They are vast, unbroken tracts of deciduous forests dominating the central Indian plains. **SSC CGL Tier I 2023**

- | | |
|---|------------------------------|
| (A) Both A and R are true and R is the correct explanation of A | (B) A is false but R is true |
| (C) Both A and R are true but R is NOT the correct explanation of A | (D) A is true but R is false |

Q71. Assertion (A): Peaty and Marshy soils are characteristically acidic.
Reason (R): They are formed by heavy accumulation of organic matter in areas of high rainfall and poor drainage. **SSC CHSL Tier I 2023**

- | | |
|------------------------------|---|
| (A) A is true but R is false | (B) Both A and R are true and R is the correct explanation of A |
| (C) A is false but R is true | (D) Both A and R are true but R is NOT the correct explanation of A |

Q72. Assertion (A): The process of Lateritization enriches the topsoil with silica.
Reason (R): Intense leaching in tropical rainforests removes iron and aluminum oxides, leaving silica behind. **SSC CGL Tier II 2022**

- | | |
|---|---|
| (A) Both A and R are true and R is the correct explanation of A | (B) A is true but R is false |
| (C) A is false but R is true | (D) Both A and R are true but R is NOT the correct explanation of A |

Q73. Match List I with List II:

List I:

- a. Inceptisols
- b. Vertisols
- c. Alfisols
- d. Aridisols

List II:

- 1. Young soils with weak horizon development (Alluvial)
- 2. Swelling and cracking clays (Black)
- 3. Moderately leached soils with subsoil clay (Red)
- 4. Soils of arid environments with poor organic matter

SSC CGL Tier II 2021

- | | |
|------------------------|------------------------|
| (A) a-1, b-3, c-2, d-4 | (B) a-4, b-3, c-2, d-1 |
| (C) a-1, b-2, c-3, d-4 | (D) a-2, b-1, c-4, d-3 |

Q74. Match List I with List II:

List I:

- a. O Horizon
- b. A Horizon
- c. B Horizon
- d. C Horizon

List II:

- 1. Organic matter layer
- 2. Topsoil (Eluviation zone)
- 3. Subsoil (Illuviation zone)
- 4. Weathered parent rock

SSC CGL Tier II 2022

(A) a-1, b-3, c-2, d-4

(B) a-1, b-2, c-3, d-4

(C) a-4, b-3, c-2, d-1

(D) a-2, b-1, c-4, d-3

Q75. Match List I with List II:

List I:

- a. Tropical Wet Evergreen
- b. Tropical Semi-Evergreen
- c. Moist Deciduous
- d. Littoral and Swamp

List II:

- 1. Rainfall > 250cm (Western Ghats)
- 2. Transition zone (Rainfall 200-250cm)
- 3. Rainfall 100-200cm (Shiwaliks, Chotanagpur)
- 4. Sundarbans and Bhitarkanika

SSC CGL Tier II 2021

(A) a-3, b-4, c-1, d-2

(B) a-1, b-2, c-3, d-4

(C) a-2, b-1, c-4, d-3

(D) a-1, b-3, c-4, d-2

Q76. Consider the following statements regarding the USDA Soil Taxonomy applied to India:

I. Inceptisols are the most widely distributed soil order in India.

II. Vertisols correspond almost exclusively to the Regur soils of the Deccan.

III. Ultisols and Oxisols represent highly weathered lateritic soils.

Which of the statements given above is/are correct?

SSC CGL Tier I 2023

(A) Only II and III

(B) Only I and III

(C) Only I and II

(D) All I, II, and III

Q77. Consider the following statements regarding Kari soils:

- I. They are heavily found in the Kuttanad region of Kerala.
- II. They are basically peaty soils with highly acidic character.
- III. They are exceptionally deficient in organic matter.

Which of the statements given above is/are correct?

SSC CHSL Tier I 2023

- (A) Only I and III
- (B) All I, II, and III
- (C) Only II and III
- (D) Only I and II

Q78. Consider the following statements regarding Ecological Succession:

- I. Primary succession occurs in areas where no soil previously existed.
- II. Secondary succession is generally faster than primary succession.
- III. The final, stable community is known as a climax community.

Which of the statements given above is/are correct?

SSC MTS 2023

- (A) Only I and II
- (B) Only II and III
- (C) Only I and III
- (D) All I, II, and III

Q79. Consider the following statements regarding the Shola Forests:

- I. They are patches of stunted tropical montane forests.
- II. They are found exclusively in the valleys of the Himalayas.
- III. They are separated by undulating montane grasslands.

Which of the statements given above is/are correct?

SSC CPO 2022

- (A) Only I and III
- (B) Only II and III
- (C) Only I and II
- (D) All I, II, and III

Q80. Which of the following statements regarding Soil Conservation techniques is NOT correct?

SSC MTS 2023

- (A) Shelterbelts are rows of trees planted to check wind erosion.
- (B) Gully plugging involves building check dams across gullies.
- (C) Mulching helps in retaining soil moisture.
- (D) Contour bunding increases the velocity of run-off water.

Q81. Which of the following statements regarding Red and Yellow soils is NOT correct?

SSC CGL Tier II 2021

- | | |
|--|--|
| (A) The red colour is due to the wide diffusion of iron. | (B) They develop on crystalline igneous rocks in low rainfall areas. |
| (C) They look yellow when they occur in a hydrated form. | (D) They are generally rich in nitrogen, phosphorus, and humus. |

Q82. Which of the following statements regarding the India State of Forest Report (ISFR) terminology is NOT correct?

SSC CGL Tier II 2022

- | | |
|---|--|
| (A) 'Very Dense Forest' implies a canopy density of 70% and above. | (B) 'Open Forest' has a canopy density between 10% and 40%. |
| (C) 'Moderately Dense Forest' has a canopy density between 40% and 70%. | (D) 'Scrub' refers to forest lands with a canopy density strictly above 10%. |

Q83. Which of the following statements regarding Alpine Vegetation in India is NOT correct?

SSC CGL Tier II 2022

- | | |
|--|---|
| (A) It is found universally across the Western Ghats above 2000m. | (B) Extensive alpine grasslands are used by nomadic tribes like Gujjars for grazing. |
| (C) It typically occurs at altitudes above 3000 meters in the Himalayas. | (D) Silver fir, junipers, and pines are prominent transitional species below this zone. |

Q84. Which of the following statements regarding Endemism in Indian Flora is NOT correct?

SSC CGL Tier II 2022

- | | |
|---|---|
| (A) The vast Indo-Gangetic plains host the highest number of endemic tree species in India. | (B) Endemic species are those restricted to a specific geographical region. |
| (C) The Western Ghats represent a global biodiversity hotspot with high endemism. | (D) The Andaman and Nicobar Islands show high floristic endemism. |

Q85. Assertion (A): The Dharwar rock system is highly economically significant for India. Reason (R): It hosts the majority of India's major metallic minerals like iron, gold, and manganese.

SSC CGL Tier II 2022

- | | |
|---|---|
| (A) A is false but R is true | (B) A is true but R is false |
| (C) Both A and R are true and R is the correct explanation of A | (D) Both A and R are true but R is NOT the correct explanation of A |

Q86. Assertion (A): Tertiary coal is generally considered of inferior quality compared to Gondwana coal.

Reason (R): Tertiary coal possesses a lower carbon content and higher moisture and sulfur content. **SSC CPO 2022**

(A) Both A and R are true but R is NOT the correct explanation of A

(B) A is false but R is true

(C) Both A and R are true and R is the correct explanation of A

(D) A is true but R is false

Q87. Assertion (A): Placer deposits are primarily mined using deep-shaft underground mining techniques.

Reason (R): They are typically accumulations of valuable minerals formed by gravity separation during sedimentary processes. **SSC CGL Tier I 2023**

(A) Both A and R are true and R is the correct explanation of A

(B) A is false but R is true

(C) Both A and R are true but R is NOT the correct explanation of A

(D) A is true but R is false

Q88. Assertion (A): India has exclusive rights to mine polymetallic nodules in the Central Indian Ocean Basin.

Reason (R): These nodules are exclusively composed of extremely pure 24-carat gold. **SSC CGL Tier II 2022**

(A) Both A and R are true and R is the correct explanation of A

(B) A is false but R is true

(C) Both A and R are true but R is NOT the correct explanation of A

(D) A is true but R is false

Q89. Assertion (A): The Malanjkhand mine in Madhya Pradesh is pivotal for India's atomic energy program.

Reason (R): It is the single largest producer of Uranium in the Indian subcontinent. **SSC CGL Tier II 2021**

(A) A is true but R is false

(B) Both A and R are true but R is NOT the correct explanation of A

(C) A is false but R is true

(D) Both A and R are true and R is the correct explanation of A

Q90. Match List I with List II:

List I:

- a. Khetri (Rajasthan)
- b. Jaduguda (Jharkhand)
- c. Panchpatmali (Odisha)
- d. Tumakuru (Karnataka)

List II:

- 1. Copper
- 2. Uranium
- 3. Bauxite
- 4. Iron Ore

SSC CHSL Tier I 2023

(A) a-1, b-3, c-2, d-4

(B) a-1, b-2, c-3, d-4

(C) a-4, b-3, c-2, d-1

(D) a-2, b-1, c-4, d-3

Q91. Match List I with List II:

List I:

- a. Gondwana System
- b. Dharwar System
- c. Vindhyan System
- d. Tertiary System

List II:

- 1. Major Coal reserves
- 2. Major Metallic minerals (Iron, Manganese)
- 3. Limestone, Sandstone, Diamonds
- 4. Petroleum and Natural Gas

SSC CPO 2022

(A) a-4, b-3, c-2, d-1

(B) a-1, b-2, c-3, d-4

(C) a-1, b-3, c-2, d-4

(D) a-2, b-1, c-4, d-3

Q92. Match List I with List II:

List I:

- a. Monazite
- b. Magnetite
- c. Anthracite
- d. Galena

List II:

- 1. Thorium and Rare Earths
- 2. High grade iron ore (magnetic)
- 3. Highest grade hard coal
- 4. Lead sulfide ore

SSC CGL Tier II 2021

(A) a-4, b-3, c-2, d-1

(B) a-1, b-3, c-2, d-4

(C) a-2, b-1, c-4, d-3

(D) a-1, b-2, c-3, d-4

Q93. Consider the following statements regarding Rare Earth Elements (REEs) in India:

- I. Monazite sands found along the Kerala coast are a prime source of Thorium.
 - II. India holds one of the largest reserves of Monazite in the world.
 - III. Extraction of REEs is highly straightforward and ecologically completely harmless.
- Which of the statements given above is/are correct?

SSC CGL Tier II 2021

(A) All I, II, and III

(B) Only I and III

(C) Only I and II

(D) Only II and III

Q94. Consider the following statements regarding Offshore Energy Resources:

- I. Bombay High is a prominent offshore oilfield located on the continental shelf.
- II. The KG (Krishna-Godavari) Basin is renowned for its massive natural gas reserves.
- III. Offshore drilling is strictly prohibited in the Exclusive Economic Zone (EEZ) by international law.

Which of the statements given above is/are correct?

SSC CGL Tier II 2022

(A) Only I and II

(B) Only II and III

(C) All I, II, and III

(D) Only I and III

Q95. Consider the following statements regarding Mica Production:

I. India is one of the world's leading producers of sheet mica.

II. It is extensively used in the electrical and electronic industries due to its dielectric strength.

III. The Koderma-Gaya-Hazaribagh belt is a primary mica-producing region.

Which of the statements given above is/are correct?

SSC CHSL Tier I 2023

(A) All I, II, and III

(B) Only I and III

(C) Only II and III

(D) Only I and II

Q96. Consider the following statements regarding the distribution of Iron Ore:

I. Hematite is predominantly found in the eastern states like Odisha and Jharkhand.

II. Magnetite deposits are highly concentrated in the southern states like Karnataka.

III. Kudremukh mines are globally known for their massive Bauxite deposits.

Which of the statements given above is/are correct?

SSC CGL Tier II 2022

(A) Only II and III

(B) Only I and II

(C) Only I and III

(D) All I, II, and III

Q97. Which of the following statements regarding Coal Reserves in India is NOT correct?

SSC CGL Tier II 2021

(A) Anthracite coal is massively abundant across the Deccan Plateau.

(B) Jharia in Jharkhand is India's largest recognized coalfield.

(C) Lignite reserves are heavily concentrated in Neyveli, Tamil Nadu.

(D) Gondwana coal constitutes over 90% of India's total coal reserves.

Q98. Which of the following statements regarding the Geological Structure of India is NOT correct?

SSC CGL Tier I 2023

(A) The Himalayas are young, structurally weak, and tectonically active fold mountains.

(B) The Deccan Trap was formed by the violent collision of two continental plates.

(C) The Indo-Gangetic plain is a geological syncline filled with fluvial deposits.

(D) The Peninsular Plateau is a highly stable, ancient crystalline shield.

Q99. Which of the following statements regarding Atomic Minerals in India is NOT correct?

SSC CPO 2022

- | | |
|--|---|
| (A) Tummalapalle in Andhra Pradesh has emerged as a significant uranium reserve. | (B) Thorium is largely derived from the monazite sands of coastal Kerala. |
| (C) Uranium is currently mined at Jaduguda in Jharkhand. | (D) India is a net exporter of Uranium to major nuclear powers globally. |

Q100. Which of the following statements regarding Non-Ferrous Minerals is NOT correct?

SSC CGL Tier I 2023

- | | |
|--|---|
| (A) The Balaghat mines are primarily known for producing high-quality Gold. | (B) Bauxite is a highly widespread non-ferrous mineral in the laterite soils of peninsular India. |
| (C) Aluminum extraction is highly energy-intensive, requiring smelters near power sources. | (D) India is critically deficient in the reserve and production of Copper. |
