

संभव BATCH

Geography Practice Set: Hard Level (Assertion-Reason & Sequences)

Under the expert guidance of: Vipulendra Tripathi Sir

Important Instructions for Aspirants:

- This practice set contains 50 **Hard Level** MCQs (Assertion-Reason, Match the Following, Sequences).
- Topics Covered: Cyclones, Water Currents, Himalayas, and India & Its Boundaries.
- No sequence is prioritized in the options to ensure maximum analytical testing.
- The Answer Key has been intentionally omitted for unassisted self-evaluation.

Q1. Assertion (A): Tropical cyclones are extremely rare at the equator.

Reason (R): The Coriolis force is zero at the equator, which prevents the generation of a vortex.

Select the correct code: [SSC CGL Tier II 2022]

A) Both A and R are true and R is the correct explanation of A

B) Both A and R are true but R is not the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q2. Which of the following statements about Extratropical Cyclones is NOT correct?

[SSC CGL 2020]

A) They originate only over the oceans.

B) They have a clear frontal system.

C) They can form over both land and sea.

D) They move from West to East.

Q3. Match List I (Tropical Cyclone) with List II (Region) and select the correct answer:

List I: a. Typhoons, b. Willy-Willies, c. Hurricanes, d. Taifu

List II: 1. Australia, 2. Japan, 3. South China Sea, 4. Caribbean Sea [SSC CPO 2019]

A) a-3, b-1, c-4, d-2

B) a-4, b-2, c-3, d-1

C) a-3, b-4, c-1, d-2

D) a-1, b-3, c-2, d-4

Q4. Consider the following statements regarding the 'Eye' of a tropical cyclone:

1. It is a region of highest atmospheric pressure.
2. It is characterized by clear skies and calm weather.
3. It features strong subsiding air.

Which of the statements given above is/are correct? [SSC CGL 2021]

- | | |
|-----------------|-----------------|
| A) 1 and 2 only | B) 2 and 3 only |
| C) 1 and 3 only | D) 1, 2, and 3 |

Q5. Arrange the following stages of a Tropical Cyclone in the correct sequential order of their development:

1. Tropical Depression
2. Tropical Storm
3. Tropical Disturbance
4. Severe Tropical Cyclone

[SSC CHSL 2020]

- | | |
|------------------|------------------|
| A) 3 - 1 - 2 - 4 | B) 1 - 3 - 2 - 4 |
| C) 3 - 2 - 1 - 4 | D) 1 - 2 - 3 - 4 |

Q6. Assertion (A): The eastern coast of India is more prone to cyclones than the western coast.

Reason (R): The Bay of Bengal is warmer and experiences higher salinity than the Arabian Sea.

Select the correct code: [SSC CGL 2019]

- | | |
|--|--|
| A) A is false but R is true | B) A is true but R is false |
| C) Both A and R are true and R is the correct explanation of A | D) Both A and R are true but R is not the correct explanation of A |

Q7. Which of the following conditions are favorable for the formation of Tropical Cyclones?

1. Sea surface temperature above 27°C
2. Absence of Coriolis force
3. Small variations in vertical wind speed
4. A pre-existing weak low-pressure area

[SSC CGL Tier II 2021]

- | | |
|---------------------|---------------------|
| A) 1, 2, and 3 only | B) 1, 3, and 4 only |
| C) 2, 3, and 4 only | D) 1, 2, 3, and 4 |

Q8. Consider the following statements about Temperate Cyclones:

1. They are confined to 35° to 65° latitudes in both hemispheres.
2. Their formation involves the convergence of two contrasting air masses.

Which of the statements given above is/are NOT correct? [SSC MTS 2020]

- | | |
|-----------------|--------------------|
| A) 1 only | B) 2 only |
| C) Both 1 and 2 | D) Neither 1 nor 2 |

Q9. Which among the following is the correct defining characteristic of the 'Fujiwhara Effect' in meteorology? [SSC CGL 2022]

- | | |
|---|--|
| A) The sudden intensification of a cyclone upon reaching the coast. | B) The interaction and orbiting of two nearby tropical cyclones. |
| C) The phenomenon of multiple lightning strikes in the eye wall. | D) The dissipating stage of an extratropical storm. |

Q10. Assertion (A): Cyclones in the northern hemisphere rotate in a counter-clockwise direction.

Reason (R): The pressure gradient force pulls air towards the low-pressure center, while the Coriolis force deflects it to the right.

Select the correct code: [SSC CHSL 2018]

- | | |
|--|--|
| A) Both A and R are true and R is the correct explanation of A | B) Both A and R are true but R is not the correct explanation of A |
| C) A is true but R is false | D) A is false but R is true |

Q11. Match List I (Storm Scale) with List II (Measurement Entity) and select the correct answer:

List I: a. Saffir-Simpson, b. Fujita, c. Beaufort, d. Richter

List II: 1. Earthquakes, 2. Tornadoes, 3. Hurricanes, 4. Wind speed over sea

[SSC CGL 2017]

A) a-3, b-2, c-4, d-1

B) a-2, b-3, c-1, d-4

C) a-4, b-1, c-2, d-3

D) a-3, b-4, c-2, d-1

Q12. Which of the following regions acts as the primary breeding ground for Extratropical Cyclones affecting northwestern India during winter (Western Disturbances)?

[SSC CPO 2019]

A) Caspian Sea

B) Mediterranean Sea

C) Red Sea

D) Black Sea

Q13. Match the following ocean currents (List I) with their nature (List II):

List I: a. Kuroshio, b. Oyashio, c. Canaries, d. Agulhas

List II: 1. Cold Atlantic, 2. Warm Pacific, 3. Warm Indian, 4. Cold Pacific

[SSC CGL Tier II 2018]

A) a-2, b-4, c-1, d-3

B) a-4, b-2, c-3, d-1

C) a-2, b-1, c-4, d-3

D) a-3, b-4, c-1, d-2

Q14. Arrange the following ocean currents from North to South as they appear in the Atlantic Ocean:

1. Labrador Current

2. Gulf Stream

3. Canary Current

4. Benguela Current

[SSC CGL 2021]

A) 1 - 2 - 3 - 4

B) 2 - 1 - 3 - 4

C) 1 - 3 - 2 - 4

D) 2 - 3 - 1 - 4

Q15. Assertion (A): The mixing of warm and cold ocean currents creates the best fishing grounds in the world.

Reason (R): Mixing of currents leads to oxygen depletion which brings fish to the surface.

Select the correct code: [SSC CHSL 2021]

A) Both A and R are true and R is the correct explanation of A

B) Both A and R are true but R is not the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q16. Which of the following statements about the Sargasso Sea is NOT correct?

[SSC CGL 2019]

A) It is surrounded by ocean currents on all sides.

B) It is located in the North Atlantic Ocean.

C) It is characterized by high salinity and distinct seaweed.

D) It is bounded by the cold Labrador current in the south.

Q17. Consider the following ocean currents:

1. Falkland Current

2. Peru (Humboldt) Current

3. West Australian Current

4. Benguela Current

Which of these are cold currents found in the Southern Hemisphere? [SSC CPO 2020]

A) 1, 2, and 4 only

B) 2, 3, and 4 only

C) 1, 3, and 4 only

D) 1, 2, 3, and 4

Q18. Assertion (A): Ocean currents on the western coasts of continents in tropical latitudes are cold.

Reason (R): Trade winds blow offshore on western coasts, leading to the upwelling of cold bottom water.

Select the correct code: [SSC CGL Tier II 2022]

A) Both A and R are true and R is the correct explanation of A

B) Both A and R are true but R is not the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q19. Which of the following currents is fundamentally driven by the density differences resulting from variations in temperature and salinity? [SSC MTS 2019]

A) Equatorial Counter Current

B) Antarctic Circumpolar Current

C) Thermohaline Circulation

D) North Atlantic Drift

Q20. Arrange the path of the Gulf Stream sequentially from its origin to its eastward extension:

1. North Atlantic Drift

2. Florida Current

3. Gulf Stream proper [SSC CHSL 2020]

A) 2 - 3 - 1

B) 3 - 2 - 1

C) 1 - 2 - 3

D) 2 - 1 - 3

Q21. Match the desert with the cold current responsible for its aridity:

List I: a. Atacama, b. Namib, c. Western Australian

List II: 1. Benguela, 2. West Australian, 3. Peru (Humboldt) [SSC CGL 2016]

A) a-3, b-1, c-2

B) a-1, b-3, c-2

C) a-2, b-1, c-3

D) a-3, b-2, c-1

Q22. Consider the following statements regarding the El Niño phenomenon:

1. It involves the anomalous cooling of the eastern Pacific.
2. It suppresses upwelling off the coast of Peru.
3. It often leads to deficit monsoons in India.

Which of the statements given above is/are correct? [SSC CGL Tier II 2020]

- | | |
|-----------------|-----------------|
| A) 1 and 2 only | B) 2 and 3 only |
| C) 1 and 3 only | D) 1, 2, and 3 |

Q23. Assertion (A): The Agulhas Current retroflects or turns back on itself before reaching the Atlantic Ocean.

Reason (R): The Antarctic Circumpolar Current pushes it eastwards into the southern Indian Ocean.

Select the correct code: [SSC CPO 2018]

- | | |
|--|--|
| A) Both A and R are true and R is the correct explanation of A | B) Both A and R are true but R is not the correct explanation of A |
| C) A is true but R is false | D) A is false but R is true |

Q24. Which of the following is NOT a part of the North Pacific Gyre? [SSC CGL 2019]

- | | |
|-----------------------------|----------------------|
| A) North Equatorial Current | B) Kuroshio Current |
| C) California Current | D) Kamchatka Current |

Q25. The periodic reversal of ocean currents in the Indian Ocean is primarily driven by: [SSC MTS 2021]

- | | |
|---|---|
| A) Thermohaline circulation | B) The Asian Monsoon wind system |
| C) The Coriolis force variations at the equator | D) The topography of the Mid-Indian Ridge |

Q26. Arrange the following Himalayan ranges from North to South:

1. Zaskar Range
2. Karakoram Range
3. Pir Panjal Range
4. Ladakh Range

[SSC CGL Tier II 2021]

A) 2 - 4 - 1 - 3

B) 2 - 1 - 4 - 3

C) 4 - 2 - 1 - 3

D) 1 - 2 - 4 - 3

Q27. Match the following Himalayan passes (List I) with the states/UTs they are located in (List II):

List I: a. Shipki La, b. Niti Pass, c. Nathu La, d. Bomdi La

List II: 1. Sikkim, 2. Arunachal Pradesh, 3. Himachal Pradesh, 4. Uttarakhand

[SSC CGL 2018]

A) a-3, b-4, c-1, d-2

B) a-4, b-3, c-2, d-1

C) a-3, b-1, c-4, d-2

D) a-1, b-4, c-3, d-2

Q28. Assertion (A): The snowline in the Eastern Himalayas is lower than that in the Western Himalayas.

Reason (R): The Eastern Himalayas receive heavier precipitation and have higher humidity compared to the Western Himalayas.

Select the correct code:

[SSC CHSL 2020]

A) Both A and R are true and R is the correct explanation of A

B) Both A and R are true but R is not the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q29. Which of the following statements about the Shiwalik range is NOT correct?

[SSC CGL 2019]

- | | |
|---|---|
| A) They are the youngest folded mountains of the Himalayan system. | B) They are composed of unconsolidated river deposits. |
| C) They maintain a continuous chain from the Indus to the Brahmaputra without any breaks. | D) Longitudinal valleys called 'Duns' are found between the Shiwaliks and the Lesser Himalayas. |

Q30. Consider the following peaks of the Himalayas:

1. Dhaulagiri
2. Makalu
3. Annapurna
4. Kanchenjunga

Arrange them from West to East: [SSC CPO 2021]

- | | |
|------------------|------------------|
| A) 1 - 3 - 2 - 4 | B) 3 - 1 - 2 - 4 |
| C) 1 - 2 - 3 - 4 | D) 3 - 2 - 1 - 4 |

Q31. Assertion (A): The Himalayas act as a formidable climatic divide.

Reason (R): They prevent the cold continental air masses of Central Asia from entering India and trap the monsoon winds.

Select the correct code: [SSC CGL Tier II 2018]

- | | |
|--|--|
| A) Both A and R are true and R is the correct explanation of A | B) Both A and R are true but R is not the correct explanation of A |
| C) A is true but R is false | D) A is false but R is true |

Q32. Match the regional divisions of the Himalayas with their bounding rivers:

List I: a. Punjab Himalayas, b. Kumaon Himalayas, c. Nepal Himalayas, d. Assam Himalayas

List II: 1. Teesta and Dihang, 2. Kali and Teesta, 3. Indus and Satluj, 4. Satluj and Kali

[SSC CGL 2017]

A) a-3, b-4, c-2, d-1

B) a-3, b-2, c-4, d-1

C) a-4, b-3, c-1, d-2

D) a-1, b-4, c-2, d-3

Q33. Consider the following statements regarding 'Karewas':

1. They are thick deposits of glacial clay and other materials embedded with moraines.

2. They are exclusively found in the Kumaon Himalayas.

3. They are useful for the cultivation of Zafran (saffron).

Which of the statements given above is/are correct? [SSC MTS 2019]

A) 1 and 3 only

B) 1 only

C) 2 and 3 only

D) 1, 2, and 3

Q34. Which of the following is NOT a sub-range of the Lesser Himalayas (Himachal)?

[SSC CHSL 2021]

A) Pir Panjal Range

B) Dhauladhar Range

C) Zaskar Range

D) Mahabharat Range

Q35. Assertion (A): The rivers of the Himalayas are antecedent in nature.

Reason (R): These rivers existed before the upliftment of the Himalayas and cut deep gorges as the mountains rose.

Select the correct code: [SSC CGL 2022]

A) Both A and R are true and R is the correct explanation of A

B) Both A and R are true but R is not the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q36. Arrange the following glaciers from North to South:

1. Siachen
2. Hispar
3. Gangotri
4. Zemu

[SSC CPO 2020]

A) 2 - 1 - 3 - 4

B) 1 - 2 - 3 - 4

C) 1 - 3 - 2 - 4

D) 2 - 3 - 1 - 4

Q37. Which among the following pairs of syntaxial bends and their anchoring peaks is NOT correctly matched?

[SSC CGL 2016]

A) Western Syntaxial Bend - Nanga Parbat

B) Eastern Syntaxial Bend - Namcha Barwa

C) Western Syntaxial Bend - Kamet

D) Both A and B are correctly matched

Q38. Consider the Main Central Thrust (MCT) and Main Boundary Thrust (MBT). Which of the following statements is correct?

[SSC CGL Tier II 2019]

A) MCT separates the Greater Himalayas from the Lesser Himalayas.

B) MBT separates the Greater Himalayas from the Trans-Himalayas.

C) MCT separates the Shiwaliks from the Indo-Gangetic plains.

D) MBT separates the Trans-Himalayas from the Tibetan Plateau.

Q39. Arrange the following neighboring countries in descending order based on the length of their land border shared with India:

1. China
2. Pakistan
3. Bangladesh
4. Nepal

[SSC CGL 2021]

A) 3 - 1 - 2 - 4

B) 3 - 2 - 1 - 4

C) 1 - 3 - 2 - 4

D) 1 - 2 - 3 - 4

Q40. Match List I (Boundary Line) with List II (Demarcated between) and select the correct answer:

List I: a. Radcliffe Line, b. McMahon Line, c. Durand Line, d. Palk Strait

List II: 1. India and Afghanistan, 2. India and Sri Lanka, 3. India and Pakistan, 4. India and China **[SSC CHSL 2018]**

A) a-3, b-4, c-1, d-2

B) a-3, b-1, c-4, d-2

C) a-4, b-3, c-1, d-2

D) a-4, b-1, c-3, d-2

Q41. Assertion (A): The standard meridian of India ($82^{\circ}30'E$) passes through five states.

Reason (R): Indian Standard Time (IST) is 5 hours and 30 minutes ahead of Greenwich Mean Time (GMT).

Select the correct code: **[SSC CGL 2020]**

A) Both A and R are true but R is not the correct explanation of A

B) Both A and R are true and R is the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q42. Which of the following states does NOT share its border with Myanmar?

[SSC CPO 2019]

A) Arunachal Pradesh

B) Nagaland

C) Manipur

D) Tripura

Q43. Arrange the following Indian states from West to East based on the passage of the Tropic of Cancer:

1. Chhattisgarh

2. Gujarat

3. Jharkhand

4. Madhya Pradesh **[SSC CGL Tier II 2022]**

A) 2 - 4 - 1 - 3

B) 2 - 1 - 4 - 3

C) 2 - 4 - 3 - 1

D) 4 - 2 - 1 - 3

Q44. Assertion (A): India's territorial limit extends towards the sea up to 12 nautical miles from the coast.

Reason (R): This area is known as the Exclusive Economic Zone (EEZ) where India has sovereign rights over marine resources.

Select the correct code: [SSC CGL 2017]

A) A is true but R is false

B) Both A and R are true and R is the correct explanation of A

C) Both A and R are true but R is not the correct explanation of A

D) A is false but R is true

Q45. Consider the following statements regarding India's borders:

1. Sikkim shares its borders with three countries: Nepal, Bhutan, and China.

2. West Bengal shares its borders with three countries: Bangladesh, Nepal, and Bhutan.

3. Arunachal Pradesh shares its borders with China, Myanmar, and Bhutan.

Which of the statements given above is/are correct? [SSC MTS 2020]

A) 1 and 2 only

B) 2 and 3 only

C) 1, 2, and 3

D) 1 and 3 only

Q46. Match the following channels (List I) with the landmasses they separate (List II):

List I: a. Eight Degree Channel, b. Nine Degree Channel, c. Ten Degree Channel, d. Duncan Passage

List II: 1. Andaman and Nicobar, 2. South Andaman and Little Andaman, 3. Minicoy and Maldives, 4. Lakshadweep and Minicoy [SSC CGL Tier II 2018]

A) a-3, b-4, c-1, d-2

B) a-4, b-3, c-1, d-2

C) a-3, b-1, c-4, d-2

D) a-4, b-1, c-3, d-2

Q47. Which among the following sequences of Indian coastal stretches from North to South along the Western Ghats is correct? [SSC CPO 2021]

A) Kathiawar Coast - Konkan Coast - Kanara Coast - Malabar Coast

B) Konkan Coast - Kathiawar Coast - Malabar Coast - Kanara Coast

C) Kathiawar Coast - Kanara Coast - Konkan Coast - Malabar Coast

D) Konkan Coast - Kanara Coast - Kathiawar Coast - Malabar Coast

Q48. Assertion (A): The longitudinal extent of India influences the local time variation across the country.

Reason (R): The distance between longitudes decreases as one moves from the equator towards the poles.

Select the correct code: [SSC CHSL 2019]

A) Both A and R are true but R is not the correct explanation of A

B) Both A and R are true and R is the correct explanation of A

C) A is true but R is false

D) A is false but R is true

Q49. Which of the following pairs of Indian states and their bordering countries is NOT correctly matched? [SSC CGL 2022]

A) Uttarakhand - Nepal and China

B) Assam - Bhutan and Bangladesh

C) Mizoram - Myanmar and Bangladesh

D) Meghalaya - Myanmar and Bangladesh

Q50. Arrange the southernmost extremities of India from North to South:

1. Kanyakumari (Cape Comorin)

2. Indira Point

3. Minicoy Island

4. Port Blair [SSC CGL Tier II 2021]

A) 4 - 3 - 1 - 2

B) 4 - 1 - 3 - 2

C) 1 - 4 - 3 - 2

D) 3 - 4 - 1 - 2
