

संभव BATCH - CRASH COURSE

World Geography: Europe, South America, Australia & Antarctica

Expert Guidance: Vipulendra Tripathi Sir

SSC CGL Tier-I & Tier-II Level Exams | 100 Premium Practice Questions | Pure Practice Set (No Answer Key)

PART - A: CONCEPTUAL & MODERATE LEVEL QUESTIONS

Q1. Which of the following rivers is the longest in Europe?

- (A) Seine
- (B) Volga
- (C) Danube
- (D) Rhine

SSC CGL 2021

Q2. The Strait of Gibraltar connects the Atlantic Ocean with which of the following seas?

- (A) Black Sea
- (B) Baltic Sea
- (C) North Sea
- (D) Mediterranean Sea

SSC CHSL 2020

Q3. Which mountain range acts as a natural boundary separating European Russia from Asian Russia?

- (A) Apennines
- (B) Ural Mountains
- (C) Carpathian Mountains
- (D) Caucasus Mountains

SSC CPO 2022

Q4. Which of the following European countries is widely known as the 'Land of Fire and Ice' due to its active volcanoes and glaciers?

- (A) Iceland
- (B) Norway
- (C) Finland
- (D) Switzerland

SSC MTS 2021

Q5. Through how many capital cities does the Danube River flow in Europe?

- (A) 2
- (B) 3
- (C) 5
- (D) 4

SSC CGL Tier-I 2022

Q6. The famous industrial 'Ruhr Region' is a highly critical coal-mining and manufacturing zone located in which country?

- (A) France
- (B) Germany
- (C) Poland
- (D) Belgium

SSC Selection Post Phase X

Q7. Which of the following cities is known as the 'Capital of Tides' and is situated on the River Thames?

- (A) Dublin
- (B) Amsterdam
- (C) London
- (D) Paris

SSC CHSL 2021

Q8. The dynamic Iberian Peninsula comprises which two prominent European nations?

- (A) Spain and Portugal
- (B) Italy and Greece
- (C) France and Germany
- (D) Norway and Sweden

SSC CPO 2020

Q9. Which sea completely separates the Italian Peninsula from the Balkan Peninsula?

- (A) Aegean Sea
- (B) Ionian Sea
- (C) Tyrrhenian Sea
- (D) Adriatic Sea

SSC CGL 2019

Q10. The highest peak of the entire European continent, Mount Elbrus, is situated within which mountain system?

- (A) Urals
- (B) Pyrenees
- (C) Caucasus Mountains
- (D) Alps

SSC CGL Tier-I 2022

Q11. Which country is called the 'Land of a Thousand Lakes'?

- (A) Norway
- (B) Finland
- (C) Estonia
- (D) Sweden

SSC CHSL 2021

Q12. The Kiel Canal provides an artificial shipping shortcut between which two water bodies?

- (A) North Sea and Baltic Sea
- (B) Baltic Sea and White Sea
- (C) English Channel and Atlantic Ocean
- (D) Mediterranean Sea and Black Sea

SSC MTS 2022

Q13. The Apennines mountain chain forms the primary physical backbone of which European country?

- (A) Switzerland
- (B) Greece
- (C) Italy
- (D) Spain

SSC Selection Post Phase XI

Q14. Which of the following is the highest navigable lake in the world, located on the border of Peru and Bolivia?

- (A) Lake Poopo
- (B) Lake Titicaca
- (C) Lake Valencia
- (D) Lake Maracaibo

SSC CGL 2023

Q15. The vast, highly fertile temperate grasslands of South America, located primarily in Argentina, are known as:

- (A) Campos
- (B) Llanos
- (C) Pampas
- (D) Selvas

SSC CHSL 2022

Q16. Angel Falls, the world's highest uninterrupted waterfall, is located on a tributary of the Orinoco River in which country?

- (A) Colombia
- (B) Guyana
- (C) Venezuela
- (D) Brazil

SSC CGL Tier-I 2021

Q17. The hyper-arid Atacama Desert, known as the driest non-polar place on Earth, stretches along the western coast of:

- (A) Peru
- (B) Chile
- (C) Argentina
- (D) Ecuador

SSC CPO 2022

Q18. Which of the following South American nations is completely landlocked?

- (A) Suriname
- (B) Uruguay
- (C) Bolivia
- (D) Paraguay

SSC MTS 2021

Q19. The equatorial rainforests of the Amazon Basin in South America are locally termed as:

- (A) Campos
- (B) Llanos
- (C) Gran Chaco
- (D) Selvas

SSC Selection Post Phase XI

Q20. Which primary mountain system extends continuously along the entire western margin of South America?

- (A) Atlas Mountains
- (B) Drakensberg
- (C) Rockies
- (D) Andes Mountains

SSC CGL 2020

Q21. The massive estuary formed by the confluence of the Uruguay River and the Paraná River is known as:

- (A) Rio de la Plata
- (B) Amazon Estuary
- (C) Orinoco Delta
- (D) Sao Francisco Estuary

SSC CHSL 2021

Q22. Which South American country is the world's leading producer and exporter of Copper?

- (A) Chile
- (B) Colombia
- (C) Brazil
- (D) Peru

SSC CPO 2020

Q23. The high-altitude, semi-arid plateau region located in the central Andes, shared by Peru and Bolivia, is called the:

- (A) Patagonian Desert
- (B) Mato Grosso
- (C) Guiana Highlands
- (D) Altiplano

SSC MTS 2020

Q24. Which strait separates the southern tip of mainland South America from the island archipelago of Tierra del Fuego?

- (A) Drake Passage
- (B) Cook Strait
- (C) Bass Strait
- (D) Strait of Magellan

SSC CGL Tier-I 2023

Q25. The cold, wind-swept desert tableland located in the rain shadow zone of the southern Andes is known as the:

- (A) Patagonian Desert
- (B) Monte Desert
- (C) Atacama Desert
- (D) Sechura Desert

SSC CGL 2022

Q26. Which of the following is the highest mountain peak on the mainland continent of Australia?

- (A) Mount Cook
- (B) Mount Kosciuszko
- (C) Mount Bruce
- (D) Mount Wilhelm

SSC CHSL 2022

Q27. The extensive, semi-arid or temperate grasslands located in the interior of Southeastern Australia are known as:

- (A) Downs
- (B) Steppes
- (C) Prairies
- (D) Veld

SSC CPO 2021

Q28. The Great Barrier Reef, the world's largest coral reef system, is situated parallel to the northeastern coast of which Australian state?

- (A) New South Wales
- (B) Western Australia
- (C) Victoria
- (D) Queensland

SSC Selection Post Phase IX

Q29. Which principal river system drains the vast structural basin of Southeastern Australia?

- (A) Swan River
- (B) Murray-Darling River System
- (C) Flinders River
- (D) Cooper Creek

SSC CGL Tier-I 2021

Q30. Which strait separates the mainland of Australia from the island state of Tasmania?

- (A) Torres Strait
- (B) Malacca Strait
- (C) Bass Strait
- (D) Cook Strait

SSC CHSL 2020

Q31. The world-famous twin gold-mining centers of Kalgoorlie and Coolgardie are located in which geographic region of Australia?

- (A) Great Artesian Basin
- (B) Murray-Darling Basin
- (C) Eastern Highlands
- (D) Western Australian Plateau

SSC MTS 2022

Q32. The massive, shallow depression in central Australia that contains the lowest point of the continent is home to which endorheic lake?

- (A) Lake Eyre
- (B) Lake Gairdner
- (C) Lake Torrens
- (D) Lake Frome

SSC CGL 2022

Q33. Which strait separates northern Australia from the island of New Guinea?

- (A) Bass Strait
- (B) Foveaux Strait
- (C) Torres Strait
- (D) Sundar Strait

SSC CPO 2023

Q34. The expansive, flat, and virtually treeless limestone plain stretching along the southern coast of Australia is known as the:

- (A) Barkly Tableland
- (B) Nullarbor Plain
- (C) Kimberley Plateau
- (D) Arnhem Land

SSC Selection Post Phase XI

Q35. Australia is the world's leading producer and exporter of which critical aluminum ore mineral?

- (A) Manganese
- (B) Bauxite
- (C) Copper
- (D) Iron Ore

SSC CHSL 2021

Q36. The high-value, deep groundwater aquifer system spanning underneath nearly one-quarter of the Australian continent is called the:

- (A) Canning Basin
- (B) Amadeus Basin
- (C) Great Artesian Basin
- (D) Murray Basin

SSC CGL Tier-I 2023

Q37. The indigenous evergreen tree genus that dominates almost three-quarters of all Australian forest tracts is:

- (A) Acacia
- (B) Eucalyptus
- (C) Maple
- (D) Baobab

SSC CPO 2020

Q38. Which of the following is the highest mountain peak in the entire continent of Antarctica?

- (A) Mount Kirkpatrick
- (B) Mount Menzies
- (C) Mount Erebus
- (D) Vinson Massif

SSC MTS 2021

Q39. What is the status of Mount Erebus, situated prominently on Ross Island in Antarctica?

- (A) It is an extinct volcanic caldera
- (B) It is the tallest peak of the Transantarctic Mountains
- (C) It is the southernmost active volcano on Earth
- (D) It is a completely dormant volcanic shield

SSC CGL 2021

Q40. Which of the following was the very first permanent Indian scientific research station established in Antarctica?

- (A) Sagar Nidhi
- (B) Maitri
- (C) Dakshin Gangotri
- (D) Bharti

SSC CHSL 2022

Q41. The second operational permanent Indian research base established in Antarctica in 1989 is officially named:

- (A) Maitri
- (B) Dakshin Gangotri
- (C) Himadri
- (D) Bharti

SSC CPO 2022

Q42. Which sea, located as a deep indentation in the Antarctic coastline, contains the world's largest floating ice shelf?

- (A) Ross Sea
- (B) Weddell Sea
- (C) Amundsen Sea
- (D) Bellingshausen Sea

SSC Selection Post Phase X

Q43. The highly advanced, state-of-the-art third Indian research station commissioned in Antarctica in 2012 is called:

- (A) Sagar Kanya
- (B) Dakshin Gangotri
- (C) Bharti
- (D) Maitri

SSC CGL 2023

Q44. Which major mountain system physically divides the continent of Antarctica into East Antarctica and West Antarctica?

- (A) Transantarctic Mountains
- (B) Gamburtsev Mountain Range
- (C) Queen Maud Mountains
- (D) Ellsworth Mountains

SSC CPO 2021

Q45. The microscopic, shrimp-like marine crustacean that forms the absolute cornerstone of the entire Antarctic oceanic food web is:

- (A) Amphipods
- (B) Copepods
- (C) Krill
- (D) Plankton

SSC MTS 2021

Q46. In which year was the international Antarctic Treaty signed in Washington, declaring the continent as a peaceful, non-militarized scientific zone?

- (A) 1985
- (B) 1972
- (C) 1959
- (D) 1961

SSC CHSL 2020

Q47. Which narrow, volatile water body separates South America from the continent of Antarctica, known for its extremely rough seas?

- (A) Strait of Magellan
- (B) Bass Strait
- (C) Drake Passage
- (D) Cook Strait

SSC CGL Tier-I 2022

Q48. The large, ice-covered peninsula that extends northward toward South America from the main Antarctic landmass is known as the:

- (A) Marie Byrd Land
- (B) Victoria Land
- (C) Palmer Peninsula
- (D) Wilkes Land

SSC Selection Post Phase XI

Q49. The absolute lowest temperature ever naturally recorded on Earth's surface (-89.2°C) was measured at which Antarctic research base?

- (A) Dome Argus
- (B) Vostok Station
- (C) Amundsen-Scott Station
- (D) McMurdo Station

SSC CGL 2020

Q50. Which unique geographic feature describes the dry, ice-free valley systems found near McMurdo Sound in Antarctica?

- (A) They are deep thermal freshwater geyser lakes
- (B) They are structural rift valleys actively spreading magma
- (C) They are covered under the thickest sub-glacial lakes on Earth
- (D) They are completely devoid of snow and ice due to katabatic winds and low humidity

SSC CPO 2020

PART - B: ADVANCED MULTI-STATEMENT & ANALYTICAL QUESTIONS

Q51. Consider the following statements regarding the physical geography of Europe:

- 1. The North European Plain extends uninterrupted from the Pyrenees in the west to the Ural Mountains in the east.**
- 2. The major rivers of Western Europe like the Rhine and Seine are perennially navigable due to the stabilizing maritime influence of the North Atlantic Drift.**
- 3. The Apennines mountain range is younger than the Ural Mountains in geological timeline.**

Which of the statements given above are correct?

- (A)** 2 and 3 only
- (B)** 1 and 3 only
- (C)** 1 and 2 only
- (D)** 1, 2 and 3

SSC CGL Tier-II 2022

Q52. Assertion (A): The hyper-arid conditions of the Atacama Desert in South America are intensified along the Pacific coast.

Reason (R): The offshore cold Humboldt (Peru) Current suppresses evaporation, while the massive Andes chain acts as an absolute rain shadow barrier blocking moist air from the Amazon.

Select the correct option:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** Both A and R are true and R is the correct explanation of A.
- (C)** A is false but R is true.
- (D)** A is true but R is false.

SSC CGL Tier-II 2023

Q53. Match List-I (Major River of Europe) with List-II (Discharge Destination Body):

List-I

- A. Volga**
- B. Danube**
- C. Rhine**
- D. Dnieper**

List-II

- 1. Black Sea**
- 2. Caspian Sea**
- 3. North Sea**
- 4. Sea of Azov**

Select the correct matching sequence:

- (A)** A-2, B-1, C-3, D-1
- (B)** A-2, B-3, C-1, D-1
- (C)** A-4, B-1, C-2, D-3
- (D)** A-1, B-2, C-3, D-4

SSC CPO Tier-II 2021

Q54. Consider the following statements about the Great Artesian Basin of Australia:

- 1. It is the largest and deepest artesian basin in the world, stretching underneath nearly 22% of the continent.**
- 2. The water from this basin flows spontaneously to the surface through artesian wells due to natural underground hydrostatic pressure.**
- 3. Due to its exceptionally low salt content, this water is primarily consumed for drinking and intensive crop cultivation without treatment.**

Which of the statements given above is/are NOT correct?

- (A)** 2 and 3 only
- (B)** 3 only
- (C)** 1, 2 and 3
- (D)** 1 and 2 only

SSC CGL Tier-II 2023

Q55. Which of the following statements is NOT correct regarding the continent of Antarctica?

- (A)** The Antarctic Treaty of 1959 explicitly prohibits all military activity, nuclear tests, and radioactive waste disposal.
- (B)** It holds approximately 90% of the world's ice and nearly 70% of the planet's fresh water.
- (C)** The thick ice sheet covering the landmass suppresses any seismic or minor earth tremors.
- (D)** It is classified as a cold desert due to its extremely low annual precipitation values.

SSC CHSL Tier-II 2022

Q56. Consider the following statements regarding the river systems of South America:

- 1. The Amazon River carries a greater volume of water than the top ten next largest rivers combined.**
- 2. The Orinoco River basin is located predominantly in Brazil and contains massive oil shale reserves.**
- 3. The Paraná River flows southward and unites with the Uruguay River to form the vast Rio de la Plata estuary.**

Which of the statements given above are correct?

- (A)** 1 and 3 only
- (B)** 1, 2 and 3
- (C)** 1 and 2 only
- (D)** 2 and 3 only

SSC Selection Post Phase XI

Q57. Assertion (A): The Western Plateau of Australia is predominantly a vast, absolute desert landscape.

Reason (R): The presence of the Great Dividing Range in the east blocks the path of moisture-laden trade winds from the Pacific Ocean, causing an extensive rain shadow effect.

Select the correct code:

- (A)** Both A and R are true and R is the correct explanation of A.
- (B)** Both A and R are true but R is NOT the correct explanation of A.
- (C)** A is false but R is true.
- (D)** A is true but R is false.

SSC CGL Tier-II 2022

Q58. Match List-I (Tectonic Plate Boundary/Feature) with List-II (Associated Geographical Location):

List-I

- A. Alpine Fault system**
- B. San Andreas Fault**
- C. Peru-Chile Trench**
- D. Mid-Atlantic Ridge**

List-II

- 1. Pacific Coast of South America**
- 2. North American Boundary**
- 3. South of Iceland**
- 4. New Zealand Alpine Zone**

Select the correct matching sequence (Note: Options match relevant context):

- (A)** A-2, B-4, C-1, D-3
- (B)** A-4, B-1, C-2, D-3
- (C)** A-4, B-2, C-1, D-3
- (D)** A-1, B-2, C-4, D-3

SSC CGL Tier-II 2023

Q59. Consider the following statements about the climate of Australia:

- 1. The northernmost rim of Australia experiences a distinct tropical monsoon climate with summer rainfall.**
- 2. The southern coastal margins of Adelaide and Perth are characterized by a classic Mediterranean climate.**
- 3. The vast interior remains arid due to the presence of high-pressure cells across the Subtropical Ridge.**

Which of the statements given above are correct?

- (A)** 1 and 2 only
- (B)** 1, 2 and 3
- (C)** 2 and 3 only
- (D)** 1 and 3 only

SSC CPO Tier-II 2022

Q60. Which of the following conditions explain the extreme wind velocity (Katabatic winds) recorded regularly along the coastlines of Antarctica?

1. The steep, sloping structure of the polar ice sheets rushing down toward sea level.
2. The extreme radiational cooling of air over the high-altitude polar interior plateau.
3. The immense gravitational pull acting on the high-density cold air masses.

Select the correct answer using codes:

- (A) 1 and 2 only
- (B) 1 and 3 only
- (C) 2 and 3 only
- (D) 1, 2 and 3

SSC Selection Post Phase XI

Q61. Consider the following statements regarding the European Union and the Eurozone geographic boundaries:

1. All member states of the European Union are geographically located within mainland Europe.
2. The Eurozone consists of those EU countries that have legally adopted the Euro as their sole currency.
3. Switzerland and Norway are members of the European Free Trade Association (EFTA) but are not EU members.

Which of the statements given above are correct?

- (A) 1, 2 and 3
- (B) 2 and 3 only
- (C) 1 and 2 only
- (D) 1 and 3 only

SSC CGL Tier-II 2022

Q62. Assertion (A): Lake Maracaibo in northern South America is a highly critical zone for the global energy economy.

Reason (R): It is a large brackish bay or tidal estuary that sits above one of the largest oil-producing repositories in the western hemisphere.

Select the correct code:

- (A) Both A and R are true and R is the correct explanation of A.
- (B) A is false but R is true.
- (C) A is true but R is false.
- (D) Both A and R are true but R is NOT the correct explanation of A.

SSC CGL Tier-II 2023

Q63. Match List-I (Geographical Region) with List-II (Dominant Mineral/Economic Resource):
List-I

- A. Ruhr Valley (Germany)
- B. Kiruna (Sweden)
- C. Chuquicamata (Chile)
- D. Pilbara Region (Australia)

List-II

- 1. High-grade Iron Ore
- 2. Coal and Heavy Industry
- 3. World's Largest Copper Mine
- 4. Massive Open-cut Iron Ore Mines

Select the correct sequence:

- (A) A-2, B-1, C-3, D-4
- (B) A-2, B-3, C-4, D-1
- (C) A-1, B-4, C-3, D-2
- (D) A-4, B-2, C-1, D-3

SSC CPO Tier-II 2021

Q64. Consider the following statements about the Transantarctic Mountains:

- 1. They extend continuously for over 3,500 km, acting as the primary physical dividing block of the continent.
- 2. They contain rich fossil records, proving that Antarctica was once covered under dense forests and attached to Gondwanaland.
- 3. The highest peak of this entire mountain network is Mount Vinson.

Which of the statements given above is/are NOT correct?

- (A) 1 and 2 only
- (B) 2 and 3 only
- (C) 1, 2 and 3
- (D) 3 only

SSC CHSL Tier-II 2022

Q65. Which of the following statements is correct regarding the unique ecological status of Lake Vostok in Antarctica?

- (A) It is an open, hyper-saline tectonic valley lake that never freezes due to deep volcanic vents.
- (B) It is the largest sub-glacial lake in Antarctica, sealed beneath nearly 4 km of ice for millions of years.
- (C) It serves as the primary freshwater source for all operational Indian and Russian research stations.
- (D) It is located at the center of the Palmer Peninsula and drains directly into the Drake Passage.

SSC CGL Tier-II 2023

Q66. Consider the following statements about the physical borders of Europe:

- 1. The Bosphorus Strait and the Dardanelles separate European Turkey from Asian Turkey.**
- 2. The Caspian Sea forms a clear natural boundary separating southeastern Europe from central Asia.**
- 3. The English Channel separates the island of Great Britain from the mainland of western Europe.**

Which of the statements given above are correct?

- (A)** 1 and 3 only
- (B)** 1 and 2 only
- (C)** 1, 2 and 3
- (D)** 2 and 3 only

SSC CGL Tier-II 2022

Q67. Assertion (A): The maritime ports along the western coast of Norway remain completely ice-free throughout the severe winter season.

Reason (R): The warm water ocean current of the North Atlantic Drift flows parallel to the western European coast, elevating surface temperatures.

Select the correct option:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** A is true but R is false.
- (C)** A is false but R is true.
- (D)** Both A and R are true and R is the correct explanation of A.

SSC CGL Tier-II 2023

Q68. Match List-I (Grasslands/Vegetation) with List-II (Geographical Location Continent):

List-I

- A. Steppes**
- B. Pampas**
- C. Downs**
- D. Tundra Lichens**

List-II

- 1. South America (Argentina)**
- 2. Eurasia / Europe border**
- 3. Australia**
- 4. Antarctic Coastal Margins**

Select the correct sequence:

- (A)** A-4, B-2, C-1, D-3
- (B)** A-2, B-1, C-3, D-4
- (C)** A-2, B-3, C-1, D-4
- (D)** A-3, B-4, C-1, D-2

SSC CPO Tier-II 2021

Q69. Consider the following statements regarding the ocean circulation patterns surrounding South America:

- 1. The cold Falkland Current flows northward along the southeastern coast of Argentina.**
- 2. The warm Brazilian Current flows southward along the northeastern coast of Brazil.**
- 3. The convergence of cold and warm currents near the Rio de la Plata creates highly hazardous foggy conditions but promotes elite fishing grounds.**

Which of the statements given above are correct?

- (A)** 1 and 2 only
- (B)** 1, 2 and 3
- (C)** 1 and 3 only
- (D)** 2 and 3 only

SSC CHSL Tier-II 2022

Q70. Which of the following geographic features is NOT located within the territorial borders of Australia?

- (A)** The Southern Alps glacier range
- (B)** The Gibson Desert
- (C)** The Great Sandy Desert
- (D)** The MacDonnell Ranges

SSC CGL Tier-II 2023

Q71. Consider the following statements about the mineral layout of South America:

- 1. The Llanos basin of Venezuela holds some of the world's largest proven conventional crude oil reserves.**
- 2. The high altitude salars (salt flats) of Bolivia, Chile, and Argentina form the globally critical 'Lithium Triangle'.**

Which of the statements given above is/are correct?

- (A)** 1 only
- (B)** 2 only
- (C)** Both 1 and 2
- (D)** Neither 1 nor 2

SSC Selection Post Phase XI

Q72. Assertion (A): The continent of Australia is frequently classified by physical geographers as the oldest, flattest, and driest inhabited landmass on Earth.

Reason (R): It lacks any active volcanic plate margins, features an incredibly low average relief, and is dominated by the dry subtropical high-pressure belt.

Select the correct code:

- (A)** Both A and R are true and R is the correct explanation of A.
- (B)** Both A and R are true but R is NOT the correct explanation of A.
- (C)** A is true but R is false.
- (D)** A is false but R is true.

SSC CGL Tier-II 2022

Q73. Consider the following statements about the marine biology and ice systems of Antarctica:

- 1. Ice shelves are massive sheets of land-based glacial ice that float on the adjacent ocean surface.**
- 2. The calving or breaking off of these floating ice shelves produces the colossal tabular icebergs of the Southern Ocean.**
- 3. The Southern Ocean circulation acts as an absolute cold thermal barrier separating Antarctic biology from sub-polar waters.**

Which of the statements given above are correct?

- (A)** 1 and 3 only
- (B)** 2 and 3 only
- (C)** 1 and 2 only
- (D)** 1, 2 and 3

SSC CPO Tier-II 2022

Q74. Match List-I (Capital City) with List-II (Flowing River Axis):

List-I

- A. Vienna**
- B. Paris**
- C. Berlin**
- D. Budapest**

List-II

- 1. Spree River**
- 2. Seine River**
- 3. Danube River (Austria Axis)**
- 4. Danube River (Hungary Axis)**

Select the correct sequence (Note: Ratios align cleanly with standard definitions):

- (A)** A-3, B-4, C-1, D-2
- (B)** A-3, B-2, C-1, D-4
- (C)** A-4, B-2, C-1, D-3
- (D)** A-3, B-1, C-2, D-4

SSC CGL Tier-II 2023

Q75. Which of the following physical regions are correctly paired with the continent they belong to?

- 1. Guiana Highlands - South America**
- 2. Meseta Central Plateau - Europe**
- 3. Kimberley Plateau - Australia**
- 4. Marie Byrd Land - Antarctica**

Select the correct answer using codes below:

- (A)** 1, 2 and 3 only
- (B)** 2, 3 and 4 only
- (C)** 1 and 3 only
- (D)** 1, 2, 3 and 4

SSC CHSL Tier-II 2022

Q76. Consider the following statements regarding the structural layout of the Alps mountain system:

- 1. It is a classic system of young fold mountains formed due to the structural collision between the African and Eurasian tectonic plates.**
- 2. The highest mountain peak of this entire Alpine chain is Mount Blanc, situated on the border of France and Italy.**
- 3. It remains completely insulated from seismic or earthquake activity due to its deep lithospheric root blocks.**

Which of the statements given above is/are correct?

- (A)** 1, 2 and 3
- (B)** 1 only
- (C)** 1 and 2 only
- (D)** 2 and 3 only

SSC Selection Post Phase XI

Q77. Assertion (A): The Great Dividing Range of Australia is geologically much older than the Andes of South America.

Reason (R): The Great Dividing Range was formed during the ancient Carboniferous period during the Hercynian orogeny, whereas the Andes are young fold mountains still actively rising along a subduction margin.

Select the correct option:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** A is false but R is true.
- (C)** A is true but R is false.
- (D)** Both A and R are true and R is the correct explanation of A.

SSC CGL Tier-II 2023

Q78. Consider the following statements regarding the legal status of the Antarctic Treaty System:

- 1. It freezes all territorial claims made by various nations over parts of the continent.**
- 2. It permanently bans all commercial extraction of mineral resources under the Madrid Protocol.**
- 3. It establishes a rotating international military police command to guard polar installations.**

Which of the statements given above are correct?

- (A)** 1 and 2 only
- (B)** 1 and 3 only
- (C)** 2 and 3 only
- (D)** 1, 2 and 3

SSC CPO Tier-II 2021

Q79. Match List-I (Active/Major Volcano) with List-II (Geographical Territory Location):

List-I

- A. Mount Erebus**
- B. Mount Vesuvius**
- C. Mount Etna**
- D. Deception Island**

List-II

- 1. Mainland Italy**
- 2. Ross Island (Antarctica Axis)**
- 3. South Shetland Islands (Antarctic Volcano)**
- 4. Sicily (Mediterranean)**

Select the correct sequence:

- (A)** A-2, B-4, C-1, D-3
- (B)** A-3, B-1, C-4, D-2
- (C)** A-1, B-2, C-4, D-3
- (D)** A-2, B-1, C-4, D-3

SSC CGL Tier-II 2022

Q80. Which of the following factors contribute directly to the creation of the hyper-saline, deep sub-glacial lake ecosystems in Antarctica?

- 1. The immense geothermal heat flux originating from deep crustal fault structures below the ice sheet.**
- 2. The severe hydrostatic pressure exerted by miles of overlying heavy ice sheet, lowering the melting point of water.**
- 3. The isolation of water pockets for millions of years allowing chemical saturation.**

Select the correct code:

- (A)** 1 and 3 only
- (B)** 1 and 2 only
- (C)** 2 and 3 only
- (D)** 1, 2 and 3

SSC CHSL Tier-II 2022

Q81. Consider the following statements regarding the maritime choke points and waterways of Europe:

- 1. The Bosphorus Strait separates the European part of Istanbul from its Asian part, connecting the Black Sea to the Sea of Marmara.**
- 2. The Skagerrak and Kattegat straits act as vital sea links connecting the North Sea to the Baltic Sea basins.**

Which of the statements given above is/are correct?

- (A)** Neither 1 nor 2
- (B)** Both 1 and 2
- (C)** 1 only
- (D)** 2 only

SSC CGL Tier-II 2023

Q82. Assertion (A): Its geographical positioning within the doldrums belt ensures uniform, perennial high temperatures combined with heavy convective downpours throughout the year.

Reason (R): The Amazon Basin contains the most extensive continuous drainage network and the highest biological diversity of any river system on Earth.

Select the correct code:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** A is false but R is true.
- (C)** Both A and R are true and R is the correct explanation of A.
- (D)** A is true but R is false.

SSC CGL Tier-II 2023

Q83. Consider the following statements regarding the physical geography of Australia:

- 1. The Great Dividing Range contains the headwaters for all major perennially flowing rivers in Eastern Australia.**
- 2. The interior plains host the Channel Country, characterized by ancient floodplains carved by intermittent rivers that drain into Lake Eyre.**
- 3. The western rim features massive, deep structural fjord coastlines identical to Norway.**

Which of the statements given above are correct?

- (A)** 1, 2 and 3
- (B)** 1 and 3 only
- (C)** 1 and 2 only
- (D)** 2 and 3 only

SSC CPO Tier-II 2022

Q84. Which of the following statement groups accurately defines the properties of the cold katabatic winds sweeping across Antarctica?

1. They are high-density winds that develop when surface air is heavily cooled over the elevated polar plateau.
2. Driven by gravity, they pick up massive velocity as they drain down the steep slopes of the ice sheets toward the coast.
3. They blow predominantly from the ocean toward the polar interior during summer.

Select the correct answer using codes below:

- (A) 2 and 3 only
- (B) 1 and 2 only
- (C) 1 and 3 only
- (D) 1, 2 and 3

SSC CHSL Tier-II 2022

Q85. Consider the following statements about the distribution of cities and rivers in Europe:

1. The Danube River flows eastward and discharges its water directly into the Mediterranean Sea.
2. The Rhine River serves as one of the world's busiest inland commercial shipping lanes, draining northward into the North Sea.

Which of the statements given above is/are correct?

- (A) Both 1 and 2
- (B) 1 only
- (C) 2 only
- (D) Neither 1 nor 2

SSC CGL Tier-II 2022

Q86. Assertion (A): The Humboldt (Peru) Current plays a definitive role in producing the extreme economic prosperity of the South American pelagic fisheries.

Reason (R): The persistent offshore wind patterns trigger intense upwelling of deep, mineral-dense cold waters, bringing colossal loads of nitrates and phosphates to the surface to sustain massive phytoplankton sheets.

Select the correct code:

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are true but R is NOT the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

SSC CGL Tier-II 2023

Q87. Consider the following statements regarding the internal sub-glacial geography of Antarctica:

- 1. The Gamburtsev Mountain Range is a massive system of peaks completely hidden beneath kilometers of ice sheet in East Antarctica.**
- 2. The core crust under the Antarctic ice sheet is entirely a low-density oceanic basalt basin formed during the Cenozoic era.**

Which of the statements given above is/are correct?

- (A)** Neither 1 nor 2
- (B)** 2 only
- (C)** Both 1 and 2
- (D)** 1 only

SSC CPO Tier-II 2022

Q88. Which of the following oilseed and agro-economic agricultural landscapes are correctly paired with their South American regions?

- 1. Pampas - Heavy mechanical wheat farming and cattle ranching (Estancias)**
- 2. Fazendas - Large-scale commercial coffee plantations in the Brazilian Highlands**
- 3. Gran Chaco - Dense, semi-arid scrub forest zone shared by Argentina, Paraguay, and Bolivia**

Select the correct code:

- (A)** 2 and 3 only
- (B)** 1 and 2 only
- (C)** 1 and 3 only
- (D)** 1, 2 and 3

SSC Selection Post Phase XI

Q89. Assertion (A): The Baltic Sea is characterized by remarkably low salinity levels compared to the open Atlantic Ocean.

Reason (R): It receives massive volumes of fresh water from numerous rivers alongside low rates of solar evaporation due to its high-latitude positioning.

Select the correct option:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** A is true but R is false.
- (C)** Both A and R are true and R is the correct explanation of A.
- (D)** A is false but R is true.

SSC CGL Tier-II 2023

Q90. Consider the following statements regarding the Great Barrier Reef of Australia:

1. It is composed of billions of tiny marine organisms known as coral polyps that secrete calcium carbonate structures.
2. It stretches continuously for over 2,300 km within the coral sea along the coast of Queensland.
3. Rising sea temperatures trigger coral bleaching, where polyps expel their symbiotic zooxanthellae algae.

Which of the statements given above are correct?

- (A) 1, 2 and 3
- (B) 1 and 2 only
- (C) 2 and 3 only
- (D) 1 and 3 only

SSC CGL Tier-II 2022

Q91. Match List-I (European Peninsula) with List-II (Geographical Description/Country Axis):

List-I

- A. Scandinavian Peninsula
- B. Iberian Peninsula
- C. Balkan Peninsula
- D. Jutland Peninsula

List-II

1. Occupied predominantly by Denmark
2. Comprises Greece, Albania, Bulgaria, and former Yugoslav nations
3. Home to Norway and Sweden
4. Bordered by the Atlantic Ocean and Mediterranean Sea (Spain/Portugal)

Select the correct matching sequence:

- (A) A-3, B-4, C-2, D-1
- (B) A-1, B-4, C-3, D-2
- (C) A-3, B-1, C-4, D-2
- (D) A-4, B-3, C-2, D-1

SSC CGL Tier-II 2023

Q92. Consider the following statements regarding the physical geography of South America:

- 1. The Guiana Highlands sit to the north of the Amazon basin and are characterized by deep tabular mountains called Tepuis.**
- 2. The Pantanal is the world's largest tropical wetland area, located mostly within Brazil and extending into Paraguay and Bolivia.**

Which of the statements given above is/are correct?

- (A)** Both 1 and 2
- (B)** 2 only
- (C)** Neither 1 nor 2
- (D)** 1 only

SSC Selection Post Phase XI

Q93. Assertion (A): The southern ocean currents create a continuous circumpolar movement around the continent of Antarctica without hitting any continental barriers.

Reason (R): The sub-polar zone features an uninterrupted global ring of open water spanning between the latitudes of 40 and 65 degrees South.

Select the correct code:

- (A)** Both A and R are true but R is NOT the correct explanation of A.
- (B)** A is true but R is false.
- (C)** Both A and R are true and R is the correct explanation of A.
- (D)** A is false but R is true.

SSC CGL Tier-II 2023

Q94. Consider the following statements regarding the urban and physical settlements of Australia:

- 1. The capital city, Canberra, is a meticulously planned inland territory situated between Sydney and Melbourne.**
- 2. The cities of Sydney and Brisbane are situated along the western arid margins of the Great Dividing Range.**

Which of the statements given above is/are correct?

- (A)** 2 only
- (B)** 1 only
- (C)** Both 1 and 2
- (D)** Neither 1 nor 2

SSC CPO Tier-II 2022

Q95. Assertion (A): The Rhine River is a primary geostrategic artery for international inland commercial transportation across Western Europe.

Reason (R): It flows through the extensive coal-rich industrial hearts of Switzerland, France, Germany, and the Netherlands, terminating near Europe's busiest maritime port, Rotterdam.

Select the correct answer using codes below:

- (A) Both A and R are true but R is NOT the correct explanation of A.
- (B) Both A and R are true and R is the correct explanation of A.
- (C) A is true but R is false.
- (D) A is false but R is true.

SSC CGL Tier-II 2023

Q96. Consider the following statements regarding the Antarctic ice sheets and global sea level mechanics:

1. The melting of floating ice shelves causes an immediate, massive direct elevation of global sea levels.
2. Land-based glaciers and ice sheets resting on the Antarctic bedrock present the core threat to global coastlines if they slide into the sea.

Which of the statements given above is/are correct?

- (A) 2 only
- (B) Neither 1 nor 2
- (C) 1 only
- (D) Both 1 and 2

SSC CHSL Tier-II 2022

Q97. Which of the following statement sequences accurately traces the course and properties of the Volga River?

1. It originates within the Valdai Hills to the northwest of Moscow.
2. It flows entirely through Russian territory before discharging into the landlocked Caspian Sea.
3. It is linked to the Baltic Sea and the White Sea via engineered canal systems.

Select the correct answer using codes:

- (A) 1 and 2 only
- (B) 1, 2 and 3
- (C) 2 and 3 only
- (D) 1 and 3 only

SSC CGL Tier-II 2023

Q98. Consider the following statements about the structural layout of the Andes Mountain network:

1. It is the longest continental mountain range in the world, stretching for over 7,000 km.
2. It forms part of the volcanic Pacific Ring of Fire and contains some of the tallest active volcanoes on Earth, like Ojos del Salado.
3. The range was created due to the transform slipping motion between the Nazca plate and the South American Plate.

Which of the statements given above are correct?

- (A) 2 and 3 only
- (B) 1, 2 and 3
- (C) 1 and 2 only
- (D) 1 and 3 only

SSC CPO Tier-II 2021

Q99. Assertion (A): The Great Dividing Range of Australia experiences high relief rainfall on its eastern face while leaving the western slopes relatively dry.

Reason (R): It directly intercepts the moisture-laden South-East Trade Winds coming across the warm Coral Sea.

Select the correct code:

- (A) A is false but R is true.
- (B) Both A and R are true and R is the correct explanation of A.
- (C) A is true but R is false.
- (D) Both A and R are true but R is NOT the correct explanation of A.

SSC CGL Tier-II 2023

Q100. Consider the following statements regarding the physical geography of Europe, South America, Australia, and Antarctica:

1. Europe has the longest coastline relative to its land area of any continent due to highly indented fjord configurations.
2. Antarctica lacks any structural dry land surface above sea level, being purely a frozen ocean block.
3. South America features the world's tallest uninterrupted waterfall, Angel Falls, located within the Guiana Highlands.

Which of the statements given above are correct?

- (A) 1 and 3 only
- (B) 2 and 3 only
- (C) 1 and 2 only
- (D) 1, 2 and 3

SSC CGL Tier-II 2022
