

संभव BATCH - CRASH COURSE

Geography: Soils, Vegetation & Agriculture of India

Expert Guidance: **Vipulendra Tripathi Sir**

SSC CGL Tier-I & Tier-II Level Exams | 100 Selected MCQs | Pure Practice Set (No Key Included)

PART - A: MODERATE LEVEL QUESTIONS

Q1. Which of the following soils covers the largest geographical area in India?

- (A) Laterite Soil
- (B) Alluvial Soil
- (C) Black Soil
- (D) Red Soil

SSC CGL 2021

Q2. Regur Soil is another commonly used term for which type of soil?

- (A) Laterite Soil
- (B) Black Soil
- (C) Alluvial Soil
- (D) Arid Soil

SSC CHSL 2020

Q3. The self-ploughing characteristic is a unique property of which soil in India?

- (A) Desert Soil
- (B) Red Soil
- (C) Black Soil
- (D) Laterite Soil

SSC CPO 2022

Q4. Newer alluvial deposits found along the floodplains of rivers are locally known as:

- (A) Bhabar
- (B) Bhangar
- (C) Khadar
- (D) Terai

SSC MTS 2021

Q5. Older alluvial plains that sit higher above the modern floodplains are classified as:

- (A) Bhangar
- (B) Reh
- (C) Khadar
- (D) Kankar

SSC CGL Tier-I 2022

Q6. Which soil type develops deep cracks during the dry summer season, aiding in aeration?

- (A) Alluvial Soil
- (B) Laterite Soil
- (C) Black Soil
- (D) Red Soil

SSC Selection Post Phase X

Q7. Laterite soil is highly rich in which of the following minerals?

- (A) Potassium and Magnesium
- (B) Phosphorus and Nitrogen
- (C) Iron and Aluminium Oxides
- (D) Calcium and Carbonates

SSC CHSL 2021

Q8. Red soil develops a reddish color primarily due to the presence of:

- (A) High humus accumulation
- (B) Abundant potassium oxides
- (C) Diffusion of iron in crystalline and metamorphic rocks
- (D) Presence of volcanic ash

SSC CPO 2020

Q9. Which type of forest covers the maximum percentage of geographical area in India?

- (A) Tropical Deciduous Forest
- (B) Mangrove Forest
- (C) Montane Forest
- (D) Tropical Evergreen Forest

SSC CGL 2019

Q10. Sandalwood (*Santalum album*) is a characteristic tree species found in:

- (A) Mangrove Forests
- (B) Tropical Deciduous Forests
- (C) Tropical Thorn Forests
- (D) Alpine Forests

SSC CGL Tier-I 2022

Q11. The famous Sundari trees are a dominant vegetation species found in:

- (A) Himalayan Montane Forests
- (B) Mangrove Forests
- (C) Tropical Thorn Forests
- (D) Tropical Evergreen Forests

SSC CHSL 2020

Q12. Which of the following states has the lowest forest cover percentage as per the India State of Forest Report?

- (A) Rajasthan
- (B) Punjab
- (C) Goa
- (D) Haryana

SSC CPO 2021

Q13. Mahogany, Ebony, and Rosewood trees are characteristic species of which forest ecosystem?

- (A) Subtropical Montane Forests
- (B) Tropical Dry Deciduous Forests
- (C) Littoral and Swamp Forests
- (D) Tropical Wet Evergreen Forests

SSC MTS 2022

Q14. In which cropping season are crops like Wheat, Gram, Barley, and Mustard grown in India?

- (A) Kharif Season
- (B) Pre-Monsoon Season
- (C) Rabi Season
- (D) Zaid Season

SSC CGL 2023

Q15. Which of the following is considered a core Kharif crop in India?

- (A) Wheat
- (B) Mustard
- (C) Rice
- (D) Gram

SSC CHSL 2022

Q16. Zaid crops are predominantly cultivated during which months of the year?

- (A) January to March
- (B) March to June
- (C) July to September
- (D) October to December

SSC CGL Tier-I 2021

Q17. Which agricultural crop is widely referred to as the 'Golden Fibre' of India?

- (A) Hemp
- (B) Silk
- (C) Jute
- (D) Cotton

SSC CPO 2022

Q18. Which Indian state stands as the largest producer of Coffee in the country?

- (A) Karnataka
- (B) Kerala
- (C) Tamil Nadu
- (D) Andhra Pradesh

SSC MTS 2021

Q19. The state of Assam is most heavily associated with the commercial plantation of which cash crop?

- (A) Tea
- (B) Coffee
- (C) Rubber
- (D) Tobacco

SSC Selection Post Phase XI

Q20. Which of the following turns into yellow color when it occurs in a hydrated form?

- (A) Black Soil
- (B) Saline Soil
- (C) Red Soil
- (D) Laterite Soil

SSC CGL 2020

Q21. Peaty and Marshy soils are commonly found in which region of India?

- (A) Thar Desert of Rajasthan
- (B) Chotanagpur Plateau of Jharkhand
- (C) Kottayam and Alappuzha districts of Kerala
- (D) Malwa Plateau of Madhya Pradesh

SSC CHSL 2021

Q22. The process of nitrogen fixation in agricultural soil is enhanced by cultivating which crops?

- (A) Fiber crops (Cotton/Jute)
- (B) Sugarcane and plantation crops
- (C) Cereal crops (Rice/Wheat)
- (D) Leguminous crops (Pulses)

SSC CPO 2020

Q23. Which of the following soil regions is locally termed as 'Usar' or 'Reh' due to high salinity?

- (A) Forest Soil
- (B) Saline and Alkaline Soil
- (C) Laterite Soil
- (D) Alluvial Soil

SSC MTS 2020

Q24. The practice of shifting cultivation is locally termed as 'Jhum' in which geographical region of India?

- (A) Western Ghats
- (B) Central India
- (C) Bundelkhand Region
- (D) North-Eastern Region

SSC CGL Tier-I 2023

Q25. Which crop requires high temperature, light rainfall, 210 frost-free days, and bright sunshine for its growth?

- (A) Sugarcane
- (B) Tea
- (C) Cotton
- (D) Jute

SSC CGL 2022

Q26. Black soil is highly retentive of which component, making it suitable for rainfed farming?

- (A) Moisture
- (B) Nitrogen
- (C) Organic humus
- (D) Phosphorus

SSC CHSL 2022

Q27. The soil found in the intensive high-rainfall regions of the Western Ghats and parts of Assam is:

- (A) Black Soil
- (B) Arid Soil
- (C) Alluvial Soil
- (D) Laterite Soil

SSC CPO 2021

Q28. Which state is the leading producer of Cotton in India as per recent agricultural data?

- (A) Telangana
- (B) Punjab
- (C) Maharashtra
- (D) Gujarat

SSC Selection Post Phase IX

Q29. The cultivation of crops along with the rearing of livestock simultaneously is defined as:

- (A) Mixed Farming
- (B) Plantation Agriculture
- (C) Intensive Farming
- (D) Dairy Farming

SSC CGL Tier-I 2021

Q30. The shifting cultivation practiced by tribals in the state of Odisha is locally called:

- (A) Bewar
- (B) Podu
- (C) Kumari
- (D) Jhum

SSC CHSL 2020

Q31. Which type of vegetation dominates the semi-arid tracts of Rajasthan, Gujarat, and parts of Haryana?

- (A) Tropical Thorn Forest
- (B) Tropical Moist Deciduous Forest
- (C) Littoral Forest
- (D) Subtropical Pine Forest

SSC MTS 2022

Q32. Which organization in India publishes the comprehensive biennial 'India State of Forest Report' (ISFR)?

- (A) Botanical Survey of India
- (B) Forest Survey of India (FSI)
- (C) National Biodiversity Authority
- (D) Ministry of Earth Sciences

SSC CGL 2022

Q33. The major wheat-producing tracts of India are predominantly situated over which soil zone?

- (A) Laterite Soil
- (B) Red and Yellow Soil
- (C) Desert Soil
- (D) Alluvial Soil

SSC CPO 2023

Q34. India's highest tea-producing region is geographically centered around:

- (A) Nilgiri hills
- (B) Darjeeling and Assam hills
- (C) Cardamom hills
- (D) Anaimalai hills

SSC Selection Post Phase XI

Q35. Which state stands out as the premier producer of Sugarcane in India?

- (A) Maharashtra
- (B) Karnataka
- (C) Tamil Nadu
- (D) Uttar Pradesh

SSC CHSL 2021

Q36. The 'Yellow Revolution' in Indian agriculture is directly associated with the production of:

- (A) Oilseeds
- (B) Turmeric
- (C) Pulses
- (D) Honey

SSC CGL Tier-I 2023

Q37. The 'Blue Revolution' launched under central schemes focuses on the rapid enhancement of:

- (A) Fisheries Sector
- (B) Water Conservation
- (C) Indigo Plantation
- (D) Fertilizer Production

SSC CPO 2020

Q38. Which state has the largest total geographical area covered under Alluvial Soil?

- (A) Uttar Pradesh
- (B) West Bengal
- (C) Bihar
- (D) Madhya Pradesh

SSC MTS 2021

Q39. Sinchon or micro-irrigation practices like Drip and Sprinkler irrigation are highly effective in which soil?

- (A) Clayey Black Soil
- (B) Peaty Soil
- (C) Alluvial Soil
- (D) Arid/Desert Soil

SSC CGL 2021

Q40. The core operational headquarters of the Indian Council of Agricultural Research (ICAR) is located at:

- (A) Bengaluru
- (B) Pusa, Bihar
- (C) Dehradun
- (D) New Delhi

SSC CHSL 2022

Q41. Which tree species is highly valued for its resin and grows extensively in the sub-tropical montane forests of Himalayas?

- (A) Chir Pine
- (B) Sal
- (C) Deodar
- (D) Teak

SSC CPO 2022

Q42. The major variety of Coffee produced in India for global export markets is:

- (A) Liberica
- (B) Excelsa
- (C) Arabica
- (D) Robusta

SSC Selection Post Phase X

Q43. Which crop is extensively grown as a Zaid crop for its high water content during summer?

- (A) Watermelon
- (B) Soyabean
- (C) Mustard
- (D) Cotton

SSC CGL 2023

Q44. The high content of organic matter or humus in Peaty soils causes the soil to turn:

- (A) Dark/Heavy Black
- (B) Reddish Brown
- (C) Bright Yellow
- (D) Ash Grey

SSC CPO 2021

Q45. The 'Silver Fibre Revolution' in India refers to the structural development and expansion of:

- (A) Synthetic Fiber
- (B) Jute
- (C) Silk
- (D) Cotton

SSC MTS 2021

Q46. Which Indian state is recognized as the largest producer of Rubber?

- (A) Kerala
- (B) Tripura
- (C) Karnataka
- (D) Tamil Nadu

SSC CHSL 2020

Q47. Tamarind, Neem, Neem-chameli, and Peepal are dominant components of which forest type?

- (A) Tropical Evergreen Forests
- (B) Montane Wet Temperate Forests
- (C) Tropical Dry Deciduous Forests
- (D) Alpine Scrub

SSC CGL Tier-I 2022

Q48. The soil type that forms as a result of intense leaching due to heavy tropical rains is:

- (A) Black Soil
- (B) Laterite Soil
- (C) Red Soil
- (D) Saline Soil

SSC Selection Post Phase XI

Q49. What is the primary factor behind the low availability of phosphorus in Indian soils?

- (A) Fixation of phosphorus in acidic and alkaline conditions
- (B) High volcanic activity in the past
- (C) Complete lack of parent rock mineral weathering
- (D) Over-irrigation in northern plains

SSC CGL 2020

Q50. The type of farming that involves growing food crops purely for self-consumption without commercial surplus is:

- (A) Subsistence Farming
- (B) Commercial Farming
- (C) Intensive Subsistence Farming
- (D) Extensive Agriculture

SSC CPO 2020

PART - B: ADVANCED / HARD LEVEL QUESTIONS

Q51. Consider the following statements regarding Alluvial Soils in India:

1. Khadar soils are fine-grained, light-colored, and frequently renewed by annual floods.
2. Bhangar soils are older alluvium, dark-colored, clayey, and contain calcareous concretions known as Kankar.
3. Alluvial soils are generally rich in potash but severely deficient in phosphorus and nitrogen.

Which of the statements given above are correct?

- (A) 1, 2 and 3
- (B) 2 and 3 only
- (C) 1 and 3 only
- (D) 1 and 2 only

SSC CGL Tier-II 2022

Q52. Assertion (A): Laterite soils are poorly suited for intensive agriculture despite receiving high rainfall.

Reason (R): Heavy rains cause intense leaching of silica and lime, leaving behind iron and aluminium oxides with low organic humus content.

Select the correct code:

- (A) Both A and R are true but R is NOT the correct explanation of A.
- (B) A is false but R is true.
- (C) A is true but R is false.
- (D) Both A and R are true and R is the correct explanation of A.

SSC CGL Tier-II 2023

Q53. Match List-I (Local Name of Shifting Cultivation) with List-II (State/Region):

List-I

- A. Jhum**
- B. Podu**
- C. Kumari**
- D. Bewar**

List-II

- 1. Andhra Pradesh**
- 2. Western Ghats**
- 3. Madhya Pradesh**
- 4. North-East India**

Select the correct matching sequence:

- (A)** A-3, B-1, C-2, D-4
- (B)** A-4, B-2, C-1, D-3
- (C)** A-4, B-1, C-2, D-3
- (D)** A-1, B-4, C-3, D-2

SSC CPO Tier-II 2021

Q54. Consider the following statements about Black Soils (Vertisols) of India:

- 1. They exhibit high elasticity, swelling when wet and shrinking heavily when dry.**
- 2. They are rich in iron, lime, calcium, and magnesium but deficient in nitrogen, phosphorus, and organic matter.**
- 3. Their dark color is primarily due to the presence of titaniferous magnetite compounds.**

Which of the statements given above is/are correct?

- (A)** 1, 2 and 3
- (B)** 1 and 2 only
- (C)** 2 and 3 only
- (D)** 1 and 3 only

SSC CGL Tier-II 2023

Q55. Which of the following statements is NOT correct regarding Tropical Wet Evergreen Forests in India?

- (A)** They shed their leaves entirely during a specific dry season lasting 2-3 months.
- (B)** They are found in regions receiving more than 200 cm of annual rainfall.
- (C)** Important species include Rosewood, Mahogany, Ebony, and Gurjan.
- (D)** The trees reach great heights up to 60 meters or even above.

SSC CHSL Tier-II 2022

Q56. Consider the following statements regarding Red and Yellow Soils:

- 1. They occupy the second-largest soil group area across the Indian peninsula.**
- 2. The soil looks red when iron is diffused in crystalline form, but looks yellow when hydrated.**
- 3. They are highly fertile in their fine-grained upland varieties and poor on coarse plain tracts.**

Which of the statements given above are correct?

- (A)** 2 and 3 only
- (B)** 1, 2 and 3
- (C)** 1 and 2 only
- (D)** 1 and 3 only

SSC Selection Post Phase XI

Q57. Assertion (A): Tropical Deciduous Forests are also called Monsoon Forests.

Reason (R): The constituent tree species shed their leaves for about six to eight weeks in dry summer to conserve scarce water.

Select the correct code:

- (A)** Both A and R are true and R is the correct explanation of A.
- (B)** A is true but R is false.
- (C)** A is false but R is true.
- (D)** Both A and R are true but R is NOT the correct explanation of A.

SSC CGL Tier-II 2022

Q58. Match List-I (Forest Type) with List-II (Dominant Tree Species):

List-I

- A. Tropical Evergreen**
- B. Tropical Moist Deciduous**
- C. Tropical Thorn**
- D. Montane Alpine**

List-II

- 1. Teak and Sal**
- 2. Rosewood and Ebony**
- 3. Juniper and Silver Fir**
- 4. Acacias and Babool**

Select the correct matching sequence:

- (A)** A-1, B-2, C-4, D-3
- (B)** A-2, B-1, C-4, D-3
- (C)** A-2, B-4, C-1, D-3
- (D)** A-4, B-1, C-2, D-3

SSC CGL Tier-II 2023

Q59. Consider the following statements about the Green Revolution in India:

- 1. It was heavily concentrated on High Yielding Varieties (HYV) of Wheat and Rice.**
- 2. It intensified regional economic disparities, favoring Punjab, Haryana, and Western UP.**
- 3. Chemical fertilizers and canal-based intensive tube-well irrigation were core prerequisites.**

Which of the statements given above are correct?

- (A)** 1, 2 and 3
- (B)** 1 and 2 only
- (C)** 1 and 3 only
- (D)** 2 and 3 only

SSC CPO Tier-II 2022

Q60. Which of the following conditions are ideal for the commercial cultivation of Cotton?

1. High temperature with a minimum of 210 frost-free days.
2. Light or moderate rainfall ranging between 50 to 100 cm.
3. Deep, moisture-retentive clayey black soils rich in lime.

Select the correct answer using codes:

- (A) 1, 2 and 3
- (B) 1 and 3 only
- (C) 2 and 3 only
- (D) 1 and 2 only

SSC Selection Post Phase XI

Q61. Consider the following statements regarding the 'Saline and Alkaline Soils' of India:

1. They are also known by names like Reh, Kallar, Usar, and Rakar.
2. They are characterized by excessive accumulation of sodium, calcium, and magnesium salts.
3. They occur heavily in areas with canal irrigation and high water tables due to capillary action.

Which of the statements given above are correct?

- (A) 1 and 2 only
- (B) 1 and 3 only
- (C) 1, 2 and 3
- (D) 2 and 3 only

SSC CGL Tier-II 2022

Q62. Assertion (A): The cultivation of Tea is heavily confined to well-drained hill slopes.

Reason (R): Stagnant water around the roots of the tea plant causes severe damage and decay to its root system.

Select the correct code:

- (A) A is false but R is true.
- (B) A is true but R is false.
- (C) Both A and R are true and R is the correct explanation of A.
- (D) Both A and R are true but R is NOT the correct explanation of A.

SSC CGL Tier-II 2023

Q63. Match List-I (Agricultural Revolution) with List-II (Associated Sector):

List-I

- A. Round Revolution**
- B. Grey Revolution**
- C. Pink Revolution**
- D. Golden Revolution**

List-II

- 1. Prawn/Onion Production**
- 2. Potato Production**
- 3. Horticulture and Honey**
- 4. Chemical Fertilizers**

Select the correct sequence:

- (A)** A-1, B-4, C-3, D-2
- (B)** A-2, B-1, C-4, D-3
- (C)** A-4, B-2, C-1, D-3
- (D)** A-2, B-4, C-1, D-3

SSC CPO Tier-II 2021

Q64. Consider the following statements about Montane Forests in India:

- 1. The wet temperate forests occur between a height of 1000 to 2000 meters.**
- 2. Between 1500 and 3000 meters, coniferous forests containing Pine, Deodar, and Spruce dominate.**
- 3. Above 3600 meters, alpine grasslands give way to tropical thorn species due to low temperatures.**

Which of the statements given above is/are NOT correct?

- (A)** 2 and 3 only
- (B)** 3 only
- (C)** 1, 2 and 3
- (D)** 1 and 2 only

SSC CHSL Tier-II 2022

Q65. Which of the following statements is correct regarding the Zaid cropping season in India?

- (A)** It depends heavily on the retreating North-East monsoon for moisture.
- (B)** It is a short season during the summer months between the Rabi and Kharif crops.
- (C)** It requires long days and heavy frost conditions for optimal maturation.
- (D)** Major crops cultivated include Wheat, Barley, Mustard, and Linseed.

SSC CGL Tier-II 2023

Q66. Consider the following statements about the distribution of soils in India:

1. Arid soils have a high content of salt and are severely deficient in nitrogen and organic humus.

2. Forest soils are acidic with low humus content in the snow-bound upper reaches of Himalayas.

3. Black soils are highly rich in phosphorus and nitrogen but poor in potash content.

Which of the statements given above are correct?

(A) 1 and 3 only

(B) 1, 2 and 3

(C) 1 and 2 only

(D) 2 and 3 only

SSC CGL Tier-II 2022

Q67. Assertion (A): Regular use of chemical fertilizers without organic manure causes soil degradation over time.

Reason (R): Chemical fertilizers rapidly destroy soil micro-fauna and accelerate the depletion of natural soil carbon.

Select the correct option:

(A) A is true but R is false.

(B) Both A and R are true but R is NOT the correct explanation of A.

(C) Both A and R are true and R is the correct explanation of A.

(D) A is false but R is true.

SSC CGL Tier-II 2023

Q68. Match List-I (Soil Type) with List-II (Major Regional Crop Association):

List-I

- A. Alluvial Soil**
- B. Black Soil**
- C. Laterite Soil**
- D. Desert Soil**

List-II

- 1. Cashew nut**
- 2. Sugarcane and Rice**
- 3. Millets and Guar**
- 4. Cotton**

Select the correct sequence:

- (A)** A-2, B-1, C-4, D-3
- (B)** A-4, B-2, C-1, D-3
- (C)** A-2, B-4, C-1, D-3
- (D)** A-3, B-4, C-1, D-2

SSC CPO Tier-II 2021

Q69. Consider the following statements regarding Mangrove (Littoral) Forests in India:

- 1. They are highly adapted to tolerate high salinity and survive tidal fluctuations.**
- 2. The roots of these plants remain submerged under saline water during high tides.**
- 3. The eastern coast of India holds the largest concentration of mangroves globally due to deltaic systems.**

Which of the statements given above are correct?

- (A)** 2 and 3 only
- (B)** 1 and 3 only
- (C)** 1, 2 and 3
- (D)** 1 and 2 only

SSC CHSL Tier-II 2022

Q70. Which of the following conditions is NOT a prerequisite for the commercial cultivation of Rice?

- (A)** High humidity with annual rainfall above 100 cm.
- (B)** Cool winter temperatures with light frost during the harvesting phase.
- (C)** Deep clayey alluvial soils that can stand water on the surface.
- (D)** High temperature exceeding 25 degrees Celsius during growth.

SSC CGL Tier-II 2023

Q71. Consider the following statements about the distribution of cash crops in India:

- 1. Jute cultivation is highly concentrated in the Ganga-Brahmaputra delta due to rich silt alluvium.**
- 2. Sugarcane yields per hectare are generally higher in South India than in North India due to maritime influence.**

Which of the statements given above is/are correct?

- (A) Neither 1 nor 2
- (B) 1 only
- (C) Both 1 and 2
- (D) 2 only

SSC Selection Post Phase XI

Q72. Assertion (A): Contour bunding and terrace farming are extensively practiced in the Northern Plains of India.

Reason (R): These methods are highly effective in checking wind erosion across expansive flat alluvial plains.

Select the correct code:

- (A) Both A and R are true and R is the correct explanation of A.
- (B) Both A and R are false.
- (C) A is true but R is false.
- (D) A is false but R is true.

SSC CGL Tier-II 2022

Q73. Consider the following statements about the classification of Indian forests:

- 1. Tropical Dry Deciduous Forests occur in regions with rainfall between 70 to 100 cm.**
- 2. Tropical Moist Deciduous Forests are common in regions with rainfall between 100 to 200 cm.**
- 3. Tree species like Sal, Teak, Arjuna, and Mulberry belong to the deciduous group.**

Which of the statements given above are correct?

- (A) 1, 2 and 3
- (B) 1 and 3 only
- (C) 1 and 2 only
- (D) 2 and 3 only

SSC CPO Tier-II 2022

Q74. Match List-I (Soil Classification/Order) with List-II (Common Indian Equivalent):

List-I

- A. Vertisols**
- B. Inceptisols**
- C. Aridisols**
- D. Alfisols**

List-II

- 1. Alluvial Soil Varieties**
- 2. Black Soil Group**
- 3. Red Soil Varieties**
- 4. Desert/Arid Soils**

Select the correct sequence:

- (A)** A-2, B-4, C-1, D-3
- (B)** A-2, B-1, C-4, D-3
- (C)** A-3, B-1, C-4, D-2
- (D)** A-1, B-2, C-4, D-3

SSC CGL Tier-II 2023

Q75. Which of the following crops are completely classified as Millets (Coarse Cereals) in India?

- 1. Jowar**
- 2. Bajra**
- 3. Ragi**
- 4. Barley**

Select the correct answer using the codes below:

- (A)** 1, 2, 3 and 4
- (B)** 2, 3 and 4 only
- (C)** 1, 2 and 3 only
- (D)** 1 and 2 only

SSC CHSL Tier-II 2022

Q76. Consider the following statements regarding Peaty and Marshy soils:

1. They are a result of the accumulation of large amounts of organic matter in anaerobic conditions.
2. They are highly alkaline in nature with zero ferrous mineral concentration.
3. They are widely distributed across the coastal tracts of Odisha, West Bengal, and Tamil Nadu.

Which of the statements given above is/are correct?

- (A) 2 and 3 only
- (B) 1, 2 and 3
- (C) 1 and 3 only
- (D) 1 only

SSC Selection Post Phase XI

Q77. Assertion (A): The Central Government has heavily emphasized the cultivation of pulses under multiple agricultural security schemes.

Reason (R): Pulses are leguminous crops that restore soil fertility by fixing atmospheric nitrogen, reducing dependency on chemical fertilizers.

Select the correct option:

- (A) A is true but R is false.
- (B) Both A and R are true and R is the correct explanation of A.
- (C) Both A and R are true but R is NOT the correct explanation of A.
- (D) A is false but R is true.

SSC CGL Tier-II 2023

Q78. Consider the following statements regarding the ideal conditions required for Tea cultivation:

1. A warm and moist frost-free climate throughout the year.
2. Frequent showers distributed evenly over the year to ensure continuous growth of tender leaves.
3. Deep, fertile, organic matter-rich soils that can retain high amounts of stagnant surface water.

Which of the statements given above is/are correct?

- (A) 1 and 2 only
- (B) 1 and 3 only
- (C) 2 and 3 only
- (D) 1, 2 and 3

SSC CPO Tier-II 2021

Q79. Match List-I (Forest Protection Initiative/Term) with List-II (Core Concept):

List-I

- A. Social Forestry**
- B. Agro-forestry**
- C. Silviculture**
- D. Joint Forest Management**

List-II

- 1. Raising trees on public or common land for community benefit**
- 2. Integrating tree cultivation with agricultural crops on the same land**
- 3. Scientific management, development, and cultivation of forest crops**
- 4. Partnership between local village communities and state forest departments**

Select the correct sequence:

- (A)** A-1, B-3, C-2, D-4
- (B)** A-2, B-1, C-3, D-4
- (C)** A-4, B-2, C-1, D-3
- (D)** A-1, B-2, C-3, D-4

SSC CGL Tier-II 2022

Q80. Which of the following state combinations produces the bulk of Maize in India?

- (A)** Karnataka, Madhya Pradesh, and Bihar
- (B)** Punjab, Haryana, and Western Uttar Pradesh
- (C)** West Bengal, Assam, and Odisha
- (D)** Kerala, Tamil Nadu, and Goa

SSC CHSL Tier-II 2022

Q81. Consider the following statements about soil erosion in India:

- 1. Sheet erosion is caused by heavy surface runoff on flat lands, removing the top layer uniformly.**
 - 2. Gully erosion is severe on steep slopes, forming deep channels that carve up land into badland topography.**
 - 3. The Chambal valley region is a classic example of severe gully erosion (ravines) in India.**
- Which of the statements given above are correct?**

- (A)** 1, 2 and 3
- (B)** 1 and 3 only
- (C)** 1 and 2 only
- (D)** 2 and 3 only

SSC CGL Tier-II 2023

Q82. Assertion (A): Shifting cultivation is highly sustainable and legally promoted across modern forest tracts in India.

Reason (R): It causes rapid regeneration of primary dense evergreen forests within a short span of two years.

Select the correct code:

- (A) A is false but R is true.
- (B) A is true but R is false.
- (C) Both A and R are true and R is the correct explanation of A.
- (D) Both A and R are false.

SSC CPO Tier-II 2022

Q83. Consider the following statements regarding the 'National Mission for Sustainable Agriculture' (NMSA):

1. It aims to enhance agricultural productivity focusing on integrated farming and water use efficiency.
2. Soil Health Card Scheme is a prominent sub-component working under its operational canopy.

Which of the statements given above is/are correct?

- (A) 1 only
- (B) Neither 1 nor 2
- (C) 2 only
- (D) Both 1 and 2

SSC Selection Post Phase XI

Q84. Which of the following statements is correct regarding the characteristic features of Alpine Vegetation in the Himalayas?

- (A) It requires high sub-tropical temperatures with annual rainfall exceeding 300 cm.
- (B) It contains extensive multi-layered structural canopies dominated by teak and mahogany trees.
- (C) It mainly consists of stunted shrubs, junipers, birches, and rhododendrons as heights approach the snow line.
- (D) The leaves are highly developed, broad, and exude resin to attract tropical insect groups.

SSC CGL Tier-II 2023

Q85. Consider the following statements about Red Soils:

1. They are derived from the weathering of ancient crystalline and metamorphic rocks.
2. They possess a high capacity to retain moisture for months without irrigation.
3. They are generally deficient in nitrogen, phosphoric acid, and humus.

Which of the statements given above are correct?

- (A) 1 and 2 only
- (B) 1, 2 and 3
- (C) 2 and 3 only
- (D) 1 and 3 only

SSC CHSL Tier-II 2022

Q86. Assertion (A): Micro-irrigation techniques like drip systems are heavily recommended for arid and semi-arid tracts.

Reason (R): They drastically minimize water loss due to evaporation and deep percolation, ensuring high crop water-use efficiency.

Select the correct code:

- (A) A is false but R is true.
- (B) A is true but R is false.
- (C) Both A and R are true and R is the correct explanation of A.
- (D) Both A and R are true but R is NOT the correct explanation of A.

SSC CGL Tier-II 2022

Q87. Consider the following statements regarding the commercial plantation of Rubber in India:

1. It requires a equatorial climate with high temperatures above 25 degrees Celsius.
2. It needs a well-distributed annual rainfall of more than 200 cm.
3. Deep, well-drained loamy soils on hill slopes are highly favorable for its cultivation.

Which of the statements given above are correct?

- (A) 1 and 2 only
- (B) 1 and 3 only
- (C) 1, 2 and 3
- (D) 2 and 3 only

SSC CPO Tier-II 2023

Q88. Match List-I (Soil Degradation Factor) with List-II (Core Mitigation/Conservation Measure):

List-I

- A. Water Erosion on Slopes**
- B. Wind Erosion in Deserts**
- C. High Soil Salinity**
- D. Severe Nutrient Depletion**

List-II

- 1. Shelterbelts/Windbreaks**
- 2. Terracing and Contour Bunding**
- 3. Crop Rotation and Leguminous Cultivation**
- 4. Application of Gypsum and Deep Leaching**

Select the correct sequence:

- (A)** A-2, B-4, C-1, D-3
- (B)** A-1, B-2, C-4, D-3
- (C)** A-3, B-1, C-4, D-2
- (D)** A-2, B-1, C-4, D-3

SSC CGL Tier-II 2023

Q89. Which of the following statement groups accurately defines the properties of 'Bhangar Alluvium'?

- 1. It constitutes the older, mature alluvial deposits located far above the modern floodplains.**
- 2. It is highly clayey, dark in appearance, and heavily studded with calcareous Kankar nodules.**
- 3. It is far more fertile and frequently renewed by floods compared to Khadar alluvium.**

Select the correct answer using codes below:

- (A)** 1 and 2 only
- (B)** 1, 2 and 3
- (C)** 2 and 3 only
- (D)** 1 and 3 only

SSC CHSL Tier-II 2022

Q90. Consider the following statements about the distribution of forests as per the India State of Forest Report (ISFR):

- 1. Madhya Pradesh possesses the largest total surface area under forest cover in India.**
- 2. Mizoram has the highest percentage of forest cover relative to its total geographical area.**

Which of the statements given above is/are correct?

- (A) Both 1 and 2
- (B) 2 only
- (C) 1 only
- (D) Neither 1 nor 2

SSC CGL Tier-II 2022

Q91. Assertion (A): Intensive subsistence agriculture is highly dominant across the densely populated river plains of India.

Reason (R): High population pressure forces farmers to extract maximum output from limited land holdings using intensive manual labor.

Select the correct code:

- (A) A is false but R is true.
- (B) A is true but R is false.
- (C) Both A and R are true but R is NOT the correct explanation of A.
- (D) Both A and R are true and R is the correct explanation of A.

SSC CGL Tier-II 2023

Q92. Consider the following statements about the 'Tropical Dry Deciduous Forests' of India:

- 1. They transition into thorn forests in areas with lower rainfall.**
- 2. They shed their leaves entirely during the dry season, creating an open park-like landscape.**
- 3. Important constituent species include Amaltas, Bel, Khair, and Palas.**

Which of the statements given above are correct?

- (A) 1 and 3 only
- (B) 1, 2 and 3
- (C) 2 and 3 only
- (D) 1 and 2 only

SSC CPO Tier-II 2022

Q93. Which of the following oilseed crops are cultivated during the Rabi season in India?

1. Mustard
2. Groundnut
3. Linseed
4. Rapeseed

Select the correct code:

- (A) 1, 3 and 4 only
- (B) 1 and 2 only
- (C) 2, 3 and 4 only
- (D) 1, 2, 3 and 4

SSC Selection Post Phase XI

Q94. Consider the following statements regarding the structural properties of 'Arid Soils':

1. They range from red to brown in color and have a distinctly sandy texture.
2. The lower horizons are heavily restricted by Kankar layers due to increasing calcium content downwards.
3. The kankar layer blocks deep water infiltration, causing surface water retention during sparse rains.

Which of the statements given above are correct?

- (A) 2 and 3 only
- (B) 1 and 2 only
- (C) 1 and 3 only
- (D) 1, 2 and 3

SSC CGL Tier-II 2023

Q95. Assertion (A): Jute requires stagnant water and high structural humidity during its harvesting phase.

Reason (R): High humidity and clean running water are essential for the retting process to cleanly separate fiber from the woody stalk.

Select the correct options:

- (A) A is true but R is false.
- (B) Both A and R are true and R is the correct explanation of A.
- (C) Both A and R are true but R is NOT the correct explanation of A.
- (D) A is false but R is true.

SSC CHSL Tier-II 2022

Q96. Consider the following statements regarding Jallikattu and Kambala sports traditions:

1. Jallikattu is a traditional bull-taming event celebrated during Pongal in Tamil Nadu.
2. Kambala is an annual buffalo race conducted across wet slushy paddy tracks in coastal Karnataka.

Which of the statements given above is/are correct?

- (A) Neither 1 nor 2
- (B) Both 1 and 2
- (C) 2 only
- (D) 1 only

SSC CGL Tier-II 2022

Q97. Match List-I (Agro-Climatic Feature) with List-II (Dominant Crop Sector Alignment):

List-I

- A. High temperature, high rainfall, standing water
- B. Cool climate, moderate rainfall, well-drained slope
- C. Warm climate, moderate rainfall, moisture-retentive deep soil
- D. Dry climate, low water table, high diurnal temp variation

List-II

- 1. Tea
- 2. Rice
- 3. Millets/Coarse Cereals
- 4. Wheat

Select the correct matching sequence:

- (A) A-2, B-1, C-4, D-3
- (B) A-3, B-1, C-4, D-2
- (C) A-2, B-4, C-1, D-3
- (D) A-1, B-2, C-4, D-3

SSC CGL Tier-II 2023

Q98. Which of the following tree groups are legally classified under 'Protected Forests' where harvesting is tightly regulated by state departments?

- (A) Forests completely open to unchecked commercial logging operations
- (B) Species where local communities enjoy traditional right to collect minor produce without clearing trees
- (C) Unclassified barren wasteland rocks near high montane peaks
- (D) Forests belonging entirely to private landlords with zero state jurisdiction

SSC Selection Post Phase XI

Q99. Consider the following statements about the distribution of pulse production in India:

1. India stands as both the largest producer and the largest consumer of pulses globally.
2. Major varieties grown include Gram, Tur (Arhar), Urad, and Moong.
3. The bulk of pulse production is concentrated in states like Madhya Pradesh, Rajasthan, and Maharashtra.

Which of the statements given above are correct?

- (A) 2 and 3 only
- (B) 1, 2 and 3
- (C) 1 and 2 only
- (D) 1 and 3 only

SSC CGL Tier-II 2023

Q100. Consider the following statements regarding 'Mixed Cropping' vs 'Inter-cropping' operational mechanics:

1. Mixed cropping involves growing two or more crops simultaneously on the same piece of land without a definite row pattern.
2. Inter-cropping involves growing two or more crops simultaneously on the same piece of land in a definite row arrangement.

Which of the statements given above is/are correct?

- (A) 1 only
- (B) Both 1 and 2
- (C) 2 only
- (D) Neither 1 nor 2

SSC CGL Tier-II 2022
