

संभव BATCH - CRASH COURSE

Geography: Solar System, Rocks, Volcanoes & Geomorphology

Expert Guidance: Vipulendra Tripathi Sir

SSC CGL Level Exams | Moderate Difficulty | Pure Practice Set (No Answer Key)

Q1. Which of the following planets is known as the 'Morning Star' or 'Evening Star'?

- (A) Mars
- (B) Mercury
- (C) Venus
- (D) Jupiter

SSC CGL 2020

Q2. The asteroid belt in our solar system is located between the orbits of which two planets?

- (A) Venus and Earth
- (B) Earth and Mars
- (C) Jupiter and Saturn
- (D) Mars and Jupiter

SSC CHSL 2021

Q3. Which is the largest moon in the Solar System?

- (A) Titan
- (B) Europa
- (C) Callisto
- (D) Ganymede

SSC CPO 2022

Q4. The planet that rotates from East to West (retrograde rotation) is:

- (A) Earth
- (B) Neptune
- (C) Venus
- (D) Mars

SSC MTS 2021

Q5. The energy of the sun is continuously generated due to the process of:

- (A) Nuclear Fission
- (B) Artificial Transmutation
- (C) Radioactivity
- (D) Nuclear Fusion

SSC CGL Tier-I 2022

Q6. Which planet in the solar system has the lowest density, even lower than that of water?

- (A) Neptune
- (B) Uranus
- (C) Jupiter
- (D) Saturn

SSC Selection Post Phase X

Q7. The outermost layer of the Sun is called the:

- (A) Corona
- (B) Lithosphere
- (C) Photosphere
- (D) Chromosphere

SSC CHSL 2020

Q8. Which is the hottest planet in the Solar System due to a runaway greenhouse effect?

- (A) Venus
- (B) Jupiter
- (C) Mercury
- (D) Mars

SSC CGL 2019

Q9. The 'Goldilocks Zone' refers to:

- (A) The region of intense asteroid collisions
- (B) The outer boundary of the solar system
- (C) The habitable zone around a star where liquid water can exist
- (D) A specific layer inside the Earth's mantle

SSC CPO 2021

Q10. Halley's Comet completes one orbit around the sun approximately every:

- (A) 86 years
- (B) 76 years
- (C) 56 years
- (D) 96 years

SSC MTS 2022

Q11. Which planet is often referred to as the 'Red Planet' due to the presence of iron oxide on its surface?

- (A) Saturn
- (B) Mars
- (C) Venus
- (D) Jupiter

SSC CGL 2023

Q12. Which of the following planets does NOT have any natural satellites (moons)?

- (A) Mercury
- (B) Uranus
- (C) Mars
- (D) Neptune

SSC CHSL 2022

Q13. Rocks that are formed by the cooling and solidification of magma or lava are known as:

- (A) Foliated rocks
- (B) Sedimentary rocks
- (C) Metamorphic rocks
- (D) Igneous rocks

SSC CGL Tier-II 2021

Q14. Fossils are most commonly found in which type of rocks?

- (A) Extrusive Igneous rocks
- (B) Sedimentary rocks
- (C) Intrusive Igneous rocks
- (D) Metamorphic rocks

SSC CPO 2020

Q15. When sandstone is subjected to extreme heat and pressure, it metamorphoses into:

- (A) Slate
- (B) Quartzite
- (C) Marble
- (D) Gneiss

SSC Selection Post 2021

Q16. Which of the following is an example of an intrusive igneous rock?

- (A) Granite
- (B) Basalt
- (C) Obsidian
- (D) Pumice

SSC MTS 2020

Q17. Coal and petroleum are typically found in:

- (A) Volcanic rocks
- (B) Metamorphic rocks
- (C) Igneous rocks
- (D) Sedimentary rocks

SSC CGL 2021

Q18. Limestone transforms into which metamorphic rock under intense heat and pressure?

- (A) Quartzite
- (B) Schist
- (C) Marble
- (D) Slate

SSC CHSL 2019

Q19. Which of the following rocks is known to float on water due to its highly porous texture?

- (A) Pumice
- (B) Granite
- (C) Shale
- (D) Basalt

SSC CPO 2022

Q20. The process by which loose, unconsolidated sediments are transformed into solid rock is called:

- (A) Crystallization
- (B) Metamorphism
- (C) Exfoliation
- (D) Lithification

SSC CGL Tier-I 2022

Q21. Basalt is a classic example of an:

- (A) Intrusive igneous rock
- (B) Extrusive igneous rock
- (C) Organic sedimentary rock
- (D) Clastic sedimentary rock

SSC MTS 2021

Q22. Which of the following is an example of an organically formed sedimentary rock?

- (A) Rock Salt
- (B) Breccia
- (C) Sandstone
- (D) Chalk

SSC CHSL 2020

Q23. The continuous process of transformation of one rock type into another is known as the:

- (A) Hydrological cycle
- (B) Rock cycle
- (C) Tectonic cycle
- (D) Carbon cycle

SSC CGL 2023

Q24. Shale undergoes metamorphism to primarily form:

- (A) Marble
- (B) Quartzite
- (C) Slate
- (D) Gneiss

SSC CPO 2023

Q25. The 'Ring of Fire', known for its numerous active volcanoes and earthquakes, is located around the:

- (A) Pacific Ocean
- (B) Atlantic Ocean
- (C) Indian Ocean
- (D) Arctic Ocean

SSC CGL 2020

Q26. A large, basin-shaped volcanic depression formed when a volcano collapses into its emptied magma chamber is called a:

- (A) Cinder cone
- (B) Crater
- (C) Caldera
- (D) Geyser

SSC CHSL 2021

Q27. Which of the following is the only active volcano in India?

- (A) Narcondam Island
- (B) Barren Island
- (C) Deccan Traps
- (D) Mount Harriet

SSC MTS 2022

Q28. Which type of volcano is characterized by broad, gently sloping sides built by highly fluid basaltic lava?

- (A) Cinder cone
- (B) Shield volcano
- (C) Stratovolcano
- (D) Composite volcano

SSC CGL Tier-II 2022

Q29. A wall-like, vertical intrusive igneous rock body that cuts across existing rock layers is known as a:

- (A) Laccolith
- (B) Sill
- (C) Batholith
- (D) Dyke

SSC CPO 2021

Q30. Which of the following is the most abundant gas emitted during a volcanic eruption?

- (A) Water vapour
- (B) Sulphur dioxide
- (C) Hydrogen sulphide
- (D) Carbon dioxide

SSC Selection Post Phase XI

Q31. A horizontal intrusion of magma that spreads out between existing rock layers is called a:

- (A) Phacolith
- (B) Sill
- (C) Batholith
- (D) Dyke

SSC CGL 2019

Q32. Mount Fuji in Japan is an example of which type of volcano?

- (A) Cinder cone
- (B) Caldera
- (C) Composite volcano (Stratovolcano)
- (D) Shield volcano

SSC CHSL 2022

Q33. The molten rock material that flows onto the Earth's surface during a volcanic eruption is called:

- (A) Magma
- (B) Tephra
- (C) Lava
- (D) Pumice

SSC MTS 2020

Q34. Which volcano is often referred to as the 'Lighthouse of the Mediterranean'?

- (A) Krakatoa
- (B) Vesuvius
- (C) Etna
- (D) Stromboli

SSC CGL 2021

Q35. What is the primary difference between weathering and erosion?

- (A) Weathering creates mountains; erosion destroys them.
- (B) Weathering is driven by wind; erosion is driven by water.
- (C) Weathering is the in-situ breakdown of rocks; erosion involves the transportation of the material.
- (D) Weathering involves transportation; erosion is the breakdown of rocks.

SSC CPO 2020

Q36. Which of the following is an example of chemical weathering?

- (A) Thermal expansion
- (B) Exfoliation
- (C) Oxidation
- (D) Frost wedging

SSC CHSL 2021

Q37. The peeling off of outer layers of rocks due to the release of pressure or temperature variations is known as:

- (A) Exfoliation
- (B) Carbonation
- (C) Oxidation
- (D) Hydration

SSC CGL Tier-I 2022

Q38. Chemical weathering is most dominant in which type of climate?

- (A) Cold and Dry
- (B) Hot and Humid
- (C) Hot and Dry
- (D) Cold and Humid

SSC MTS 2021

Q39. A 'V-shaped valley' is a characteristic topographical feature formed by the erosional work of:

- (A) Rivers
- (B) Wind
- (C) Glaciers
- (D) Groundwater

SSC Selection Post Phase X

Q40. Which geomorphic agent is responsible for the formation of a 'U-shaped valley'?

- (A) Sea waves
- (B) Glaciers
- (C) Rivers
- (D) Wind

SSC CGL 2023

Q41. Mushroom rocks (Zeugen) are primarily formed by the erosional action of:

- (A) Groundwater
- (B) Ocean waves
- (C) Glaciers
- (D) Wind

SSC CPO 2022

Q42. Which of the following landforms is associated with the depositional work of a river?

- (A) Waterfall
- (B) Delta
- (C) Gorge
- (D) Canyon

SSC CHSL 2020

Q43. Stalactites and Stalagmites are depositional features commonly found in karst topographies, created by:

- (A) Glaciers
- (B) Groundwater
- (C) Sea waves
- (D) Wind

SSC CGL 2021

Q44. The mass movement of rock, debris, or soil down a slope primarily under the influence of gravity is called:

- (A) Deposition
- (B) Weathering
- (C) Mass wasting
- (D) Carbonation

SSC MTS 2022

Q45. A horseshoe-shaped lake formed when a wide meander of a river is cut off from the main channel is known as:

- (A) A crater lake
- (B) A playa lake
- (C) A glacial lake
- (D) An ox-bow lake

SSC CPO 2023

Q46. Which of the following is a depositional landform formed by glaciers?

- (A) Horns
- (B) Aretes
- (C) Moraines
- (D) Cirques

SSC CGL Tier-II 2022

Q47. Loess is an extensive deposit of fine-grained, silty material primarily transported and deposited by:

- (A) Glaciers
- (B) Ocean currents
- (C) Rivers
- (D) Wind

SSC CHSL 2019

Q48. Sinkholes are a common erosional feature found predominantly in regions with which type of underlying rock?

- (A) Basalt
- (B) Limestone
- (C) Quartzite
- (D) Granite

SSC Selection Post 2021

Q49. The gradual dissolution of limestone by slightly acidic rainwater is a process known as:

- (A) Carbonation
- (B) Exfoliation
- (C) Frost shattering
- (D) Oxidation

SSC CGL 2020

Q50. The sudden, rapid flow of a mixture of volcanic ash, debris, and water down the slope of a volcano is called a:

- (A) Caldera
- (B) Geyser
- (C) Batholith
- (D) Lahar

SSC MTS 2021
